Geology Subject Index
Volume 11

absolute age *see also* geochronology; isotopes

absolute age—dates
andesites: Tectonic implications of mid-Tertiary dikes in west-central New Mexico
(Laughlin, A. W., *et al.*) 1: 45
anorthosite: Origin and age of Adirondack anorthosites re-evaluated with Nd isotopes
(Basu, Asish R., *et al.*) 9: 514
carbonates: Late Quaternary U-series speleothem growth record from southeastern Minnesota
(Lively, R. S.) 5: 259
drift: Radiocarbon-dated evidence of worldwide early Holocene climate change
(Beget, James E.) 7: 389
marine sediments: Increased productivity in the eastern equatorial Pacific during the last glacial maximum (19,000 to 14,000 yr B.P.)
(Pedersen, Thomas F.) 1: 16
metamorphic rocks: Geology and origin of Meatiq Dome, Egypt; a Precambrian metamorphic core complex?
(Sturchio, Neil C., *et al.*) 2: 72
volcanic ash: Radiometric dating of ash partings in coal of the Eocene Puget Group, Washington; implications for paleobotanical stages
(Turner, Donald L., *et al.*) 9: 527
volcanic rocks: Distribution of differentiated tholeiitic basalts on the lower East Rift Zone of Kilauea Volcano, Hawaii; a possible guide to geothermal exploration
(Moore, Richard B.) 3: 136
— Nested calderas and trapdoor uplift at Pantelleria, Strait of Sicily
(Mahood, Gail, *et al.*) 12: 722
wood: Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California
(McLaughlin, R. J., *et al.*) 1: 35
— Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California; discussion and reply
(Morner, N. A., *et al.*) 10: 621

absolute age—methods
C-14: Limestone and the problem of radiocarbon dating of land-snail shell carbonate
(Goodfriend, Glenn A., *et al.*) 10: 575

acoustical surveys *see under* geophysical surveys *under* Atlantic Ocean; Pacific Ocean

Aegean Sea—oceanography
sediments: Flow-head deposits in ash turbidites
(Sparks, R. S. J., *et al.*) 6: 348

aeromagnetic surveys *see* magnetic surveys *under* geophysical surveys *under* Minnesota; Wisconsin

Africa *see also* Egypt; Libya; Tanzania

Alaska—tectonophysics
plate tectonics: Model for the origin of the Yakutat Block, an accreting terrane in the northern Gulf of Alaska
(Bruns, Terry R.) 12: 718
— Seven Devils terrane; is it really a piece of Wrangellia?
(Sarewitz, Daniel) 11: 634

algal flora—biostratigraphy
Cambrian: Precambrian-Cambrian transition problem in western North America; Part II, Early Cambrian skeletonized fauna and associated fossils from Sonora, Mexico
(McMenamin, Mark A. S., *et al.*) 4: 227
Devonian: Foerstia from the Antrim Shale (Devonian) of Michigan
(Matthews, R. David) 6: 327

algal flora—ecology
anaerobic environment: Role of bacterial mats in oxygen-deficient marine basins and coastal upwelling regimes; preliminary report
(Williams, Loretta Ann, *et al.*) 5: 267

algal flora—paleoecology
Archean: Evolutionary and geologic consequences of organic carbon fixing in the primitive anoxic ocean
(Berry, W. B. N., *et al.*) 3: 141

Alps *see also* the individual countries

Alps—geochemistry
isotopes: Origin of calcite in syntectonic veins as determined from carbon-isotope ratios
(Dietrich, Dorothee, *et al.*) 9: 547

Alps—sedimentary petrology
sedimentary structures: Neptunic dikes and their relation to the hydrodynamic circulation of submarine hydrothermal systems
(Hsu, Kenneth J.) 8: 455

Alps—structural geology
tectonics: Role of shear in development of the Helvetic fold-thrust belt of Switzerland
(Ramsay, John G., *et al.*) 8: 439

amino acids *see under* organic materials

ammonites *see* Mollusca

ancient ice ages *see under* glacial geology

Andes *see also* the individual countries

andesites *see under* igneous rocks

Antarctic Ocean—stratigraphy
Oligocene: Late Oligocene-early Miocene glacial record of the Ross Sea, Antarctica; evidence from DSDP Site 270
(Leckie, R. Mark, *et al.*) 10: 578

Antarctica—stratigraphy
Miocene: Late Oligocene-early Miocene glacial record of the Ross Sea, Antarctica; evidence from DSDP Site 270
(Leckie, R. Mark, *et al.*) 10: 578

Antarctica—tectonophysics
plate tectonics: The Antarctic Plate; a global perspective
(Dalziel, Ian W. D., *et al.*) 2: 118

Appalachians *see also* the individual states and provinces

Appalachians—seismology
crust: Reprocessed COCORP Southern Appalachian reflection data; root zone to coastal plain
(Iverson, William P., *et al.*) 7: 422

Appalachians—structural geology
tectonics: Analogous tectonic evolution of the Ordovician foredeeps, Southern and Central Appalachians; discussions and reply
(Stephens, George C., *et al.*) 8: 489
— Analogous tectonic evolution of the Ordovician foredeeps, Southern and Central Appalachians; discussion and reply
(Hiscott, R. N., *et al.*) 12: 732
— Some consequences of palinspastic reconstruction in the Southern Appalachians
(Cook, Frederick A.) 2: 86
— Tectonic model for kimberlite emplacement in the Appalachian Plateau of Pennsylvania; discussion and reply
(Dennison, John M., *et al.*) 4: 252

Appalachians—tectonophysics
crust: Crustal structure beneath the Southern Appalachians; nonuniqueness of gravity modeling
(Hutchinson, Deborah R., *et al.*) 10: 611
— Some consequences of palinspastic reconstruction in the Southern Appalachians
(Cook, Frederick A.) 2: 86

Arabian Peninsula *see also* Oman; United Arab Emirates

Arabian Peninsula—structural geology
tectonics: Fluid inclusion petrography and tectonic-burial history of the Al Ali No. 2 well; evidence for the timing of diagenesis and oil migration, northern Oman Foredeep
(Burruss, R. C., *et al.*) 10: 567

archaeology *see also under* stratigraphy *under* Mediterranean region; symposia

Archean—stratigraphy
paleoecology: Evolutionary and geologic consequences of organic carbon fixing in the primitive anoxic ocean
(Berry, W. B. N., *et al.*) 3: 141

Archean—tectonophysics
plate tectonics: Model for Archean plate tectonics
(Nisbet, E. G., *et al.*) 7: 376
— Role of a thin, komatiite-rich oceanic crust in the Archean plate-tectonic process
(Arndt, Nicholas T.) 7: 372

archeology *see* archaeology *under* stratigraphy *under* Mediterranean region; symposia

Arctic Ocean—geochronology
Pleistocene: Short-period geomagnetic excursion recorded in Pleistocene sediments of Baffin Bay and Davis Strait
(Aksu, A. E.) 9: 537

Arctic Ocean—stratigraphy
Pleistocene: Baffin Bay; present-day analog of the central Arctic during late Pliocene to mid-Pleistocene time
(Herman, Yvonne) 6: 356
Pliocene: Baffin Bay; present-day analog of the central Arctic during late Pliocene to mid-Pleistocene time
(Herman, Yvonne) 6: 356

Arctic region *see also* the individual countries; Greenland

Arizona—geomorphology
erosion features: Use of packrat middens to determine rates of cliff retreat in the eastern Grand Canyon, Arizona; discussions and replies
(Hose, Louise D., *et al.*) 5: 314
— Use of packrat middens to determine rates of cliff retreat in the eastern Grand Canyon, Arizona; discussion and reply
(Smith, Bernard J., *et al.*) 8: 494

Arizona—stratigraphy
Cretaceous: Tectonic models for Early Cretaceous rifting in southeastern Arizona; discussion and reply
(Drewes, Harald, *et al.*) 6: 364
Proterozoic: Characteristics, depositional environment, and tectonic interpretations of the Proterozoic Cardenas Lavas, eastern Grand Canyon, Arizona
(Lucchitta, Ivo, *et al.*) 3: 177

Arizona—structural geology
neotectonics: Shear-zone model for the origin of metamorphic core complexes
(Davis, George H.) 6: 342
tectonics: Characteristics, depositional environment, and tectonic interpretations of the Proterozoic Cardenas Lavas, eastern Grand Canyon, Arizona
(Lucchitta, Ivo, *et al.*) 3: 177

Arizona—tectonophysics
plate tectonics: Tectonic models for Early Cretaceous rifting in southeastern Arizona; discussion and reply
(Drewes, Harald, *et al.*) 6: 364

Arkansas—structural geology
tectonics: Tectonic history of the Ouachita Orogen
(Thomas, William A., *et al.*) 8: 482

artifacts *see* archaeology *under* stratigraphy *under* Mediterranean region; symposia

Asia *see also* Arabian Peninsula; China; Far East; Japan

Asia—tectonophysics
plate tectonics: Comparison of terrane accretion in modern Southeast Asia and the Mesozoic North American Cordillera
(Silver, Eli A., *et al.*) 4: 198

Atlantic Coastal Plain—seismology
crust: Reprocessed COCORP Southern Appalachian reflection data; root zone to coastal plain
(Iverson, William P., *et al.*) 7: 422

Atlantic Ocean *see also* Caribbean Sea; Gulf of Mexico

Atlantic Ocean—geochemistry
isotopes: Seasonal temperature-salinity changes and thermocline development in the Mid-Atlantic Bight as recorded by the isotopic composition of bivalves
(Arthur, Michael A., *et al.*) 11: 655

Atlantic Ocean—geophysical surveys
acoustical surveys: Distributary channel meandering and bifurcation patterns on the Amazon deep-sea fan as revealed by long-range side-scan sonar (GLORIA)
(Damuth, John E., *et al.*) 2: 94
— Furrowed outcrops of Eocene chalk on the lower continental slope offshore New Jersey
(Robb, James M., *et al.*) 3: 182
seismic surveys: Age relationships of distributary channels on Amazon deep-sea fan; implications for fan growth pattern
(Damuth, John E., *et al.*) 8: 470
— Intrabasement structure in the southern Angola Basin
(Musgrove, Lee A., *et al.*) 3: 169
— Long decollements and mud volcanoes; evidence from the Barbados Ridge Complex for the role of high pore-fluid pressure in the development of an accretionary complex
(Westbrook, G. K., *et al.*) 5: 279

Atlantic Ocean—oceanography
ocean floors: Age relationships of distributary channels on Amazon deep-sea fan; implications for fan growth pattern
(Damuth, John E., *et al.*) 8: 470
— Distributary channel meandering and bifurcation patterns on the Amazon deep-sea fan as revealed by long-range side-scan sonar (GLORIA)
(Damuth, John E., *et al.*) 2: 94
sediments: Quaternary aragonite cycles and oxygen-isotope record in Bahamian carbonate ooze
(Droxler, A. W., *et al.*) 4: 235

Atlantic Ocean—seismology
crust: Intrabasement structure in the southern Angola Basin
(Musgrove, Lee A., *et al.*) 3: 169

Atlantic Ocean—stratigraphy
Quaternary: Isotope-plankton comparisons in a late Quaternary core with a stable temperature history
(Crowley, T. J., *et al.*) 5: 275

Atlantic region *see also* the individual countries

atolls *see* reefs *under* oceanography *under* Pacific Ocean

Australasia *see also* New Zealand

automatic data processing—geophysical surveys
seismic surveys: Reprocessed COCORP Southern Appalachian reflection data; root zone to coastal plain
(Iverson, William P., *et al.*) 7: 422

avalanches *see under* mass movements *under* geomorphology

bacteria—paleoecology
Archean: Evolutionary and geologic consequences of organic carbon fixing in the primitive anoxic ocean
(Berry, W. B. N., *et al.*) 3: 141

Bahamas—stratigraphy
Quaternary: Quaternary aragonite cycles and oxygen-isotope record in Bahamian carbonate ooze
(Droxler, A. W., *et al.*) 4: 235

Baltic region *see also* the individual countries

Barbados—oceanography
ocean floors: Long decollements and mud volcanoes; evidence from the Barbados Ridge Complex for the role of high pore-fluid pressure in the development of an accretionary complex
(Westbrook, G. K., *et al.*) 5: 279

basalts *see under* igneous rocks

Basin and Range Province—seismology
crust: Cenozoic and Mesozoic structure of the eastern Basin and Range Province, Utah, from COCORP seismic-reflection data
(Allmendinger, Richard W., *et al.*) 9: 532

Basin and Range Province—structural geology
neotectonics: Shear-zone model for the origin of metamorphic core complexes
(Davis, George H.) 6: 342
tectonics: Cenozoic and Mesozoic structure of the eastern Basin and Range Province, Utah, from COCORP seismic-reflection data
(Allmendinger, Richard W., *et al.*) 9: 532
biogeography—corals
Paleozoic: Corals from a dismembered late Paleozoic paleo-Pacific plateau
(Stevens, Calvin H.) 10: 603
biogeography—mollusks
Cambrian: Cambrian cephalopods
(Chen Jun-yuan, *et al.*) 11: 647
biologic evolution *see under* paleontology
Brazil—structural geology
tectonics: Amazon Rift and Pisco-Jurua Fault; their relation to the separation of North America from Gondwana
(Szatmari, Peter) 5: 300
British Columbia—stratigraphy
Paleozoic: Corals from a dismembered late Paleozoic paleo-Pacific plateau
(Stevens, Calvin H.) 10: 603
British Columbia—structural geology
tectonics: Alpine model for the internal metamorphic zones of the North American Cordillera
(Mattauer, Maurice, *et al.*) 1: 11
— Shuswap Terrane of British Columbia; a Mesozoic "core complex"
(Brown, Richard L., *et al.*) 3: 164
British Columbia—tectonophysics
plate tectonics: Seven Devils terrane; is it really a piece of Wrangellia?
(Sarewitz, Daniel) 11: 634
burrows *see* ichnofossils
calcite *see also under* carbonates *under* minerals
California—geochronology
Cenozoic: Rates of late Cenozoic tectonism in the Vallecito-Fish Creek basin, western Imperial Valley, California
(Johnson, Noye M., *et al.*) 11: 664
Pleistocene: Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California
(McLaughlin, R. J., *et al.*) 1: 35
— Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California; discussion and reply
(Morner, N. A., *et al.*) 10: 621
California—petrology
intrusions: Structural evidence for dikes beneath silicic domes, Medicine Lake Highland Volcano, California
(Fink, Jonathan H., *et al.*) 8: 458
magmas: Chemical differentiation of the Bishop Tuff and other high-silica magmas through crystallization processes
(Michael, Peter J.) 1: 31
— Chemical differentiation of the Bishop Tuff and other high-silica magmas through crystallization processes; discussion and reply
(Hildreth, Wes, *et al.*) 10: 622
California—sedimentary petrology
diagenesis: Burial dolomitization in the Lost Burro Formation (Devonian), east-central California, and the significance of late diagenetic dolomitization
(Zenger, Donald H.) 9: 519
California—seismology
earthquakes: Triggered reverse fault and earthquake due to crustal unloading, Northwest Transverse Ranges, California
(Yerkes, R. F., *et al.*) 5: 287
California—stratigraphy
Cretaceous: Marine magnetic anomaly 33-34 identified in the Upper Cretaceous of the Great Valley Sequence of California
(Ward, Peter D., *et al.*) 2: 90
Ordovician: Ordovician conodonts from metamorphosed carbonates of the Salton Trough, California
(Miller, Richard H., *et al.*) 7: 410
Phanerozoic: Paleomagnetic data from the Redding section of the eastern Klamath belt, Northern California
(Fagin, Stuart W., *et al.*) 9: 505
California—structural geology
folds: Complex refolding history of the Pelona, Orocopia, and Rand schists, Southern California
(Jacobson, Carl E.) 10: 583
neotectonics: Displacements on late Cenozoic strike-slip faults of the central Mojave Desert, California
(Dokka, Roy K.) 5: 305
— Extensional tectonics in the Death Valley area, California; transport of the Panamint Range structural block 80 km northwestward
(Stewart, John H.) 3: 153
— Rates of late Cenozoic tectonism in the Vallecito-Fish Creek basin, western Imperial Valley, California
(Johnson, Noye M., *et al.*) 11: 664
— Tectonic preservation of the divide between the Salton Basin and the Gulf of California
(Gilmore, Thomas D., *et al.*) 8: 474
— Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California
(McLaughlin, R. J., *et al.*) 1: 35
— Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California; discussion and reply
(Morner, N. A., *et al.*) 10: 621
California—tectonophysics
plate tectonics: Cenozoic convergence along the California coast; a qualitative test of the hot-spot approximation; discussion and reply
(Nilsen, Tor H., *et al.*) 11: 673
Cambrian *see also under* stratigraphy *under* China; Great Basin; Mexico; Nevada
Canada *see also* Appalachians; Atlantic Coastal Plain; British Columbia; Canadian Shield; Great Lakes region; Great Plains; Newfoundland; Northwest Territories; Ontario; Rocky Mountains
Canada—structural geology
tectonics: Devonian-Mississippian sinistral transcurrent faulting along the cratonic margin of western North America; a hypothesis
(Eisbacher, G. H.) 1: 7
— Tectonic accretion and the origin of the two major metamorphic and plutonic welts in the Canadian Cordillera; discussion and reply
(Brew, David A., *et al.*) 7: 427
Canadian Shield—geomorphology
meteor craters: Concentrically zoned pattern in the Bouguer gravity anomaly map of northeastern North America; discussion and reply
(Briggs, Reginald P., *et al.*) 5: 318
Canadian Shield—petrology
metamorphic rocks: Archean crust as revealed in the Kapuskasing Uplift, Superior Province, Canada
(Percival, J. A., *et al.*) 6: 323
Canadian Shield—sedimentary petrology
sedimentary rocks: Evidence for primary aragonite precipitation, lower Proterozoic (1.9-Ga) Rocknest Dolomite, Wopmay Orogen, Northwest Canada
(Grotzinger, J. P., *et al.*) 12: 710
Canadian Shield—tectonophysics
plate tectonics: Model for suturing of Superior and Churchill plates; an example of double indentation tectonics
(Gibb, R. A.) 7: 413
carbon—abundance
mantle: Liquid carbon in the lower mantle?
(Dickey, John S., Jr., *et al.*) 4: 219
marine sediments: Increased productivity in the eastern equatorial Pacific during the last glacial maximum (19,000 to 14,000 yr B.P.)
(Pedersen, Thomas F.) 1: 16
carbon—geochemistry
biomass: Evolutionary and geologic consequences of organic carbon fixing in the primitive anoxic ocean
(Berry, W. B. N., *et al.*) 3: 141

carbon—isotopes
C-13/C-12: Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335
— Limestone and the problem of radiocarbon dating of land-snail shell carbonate
(Goodfriend, Glenn A., *et al.*) 10: 575
— Origin of calcite in syntectonic veins as determined from carbon-isotope ratios
(Dietrich, Dorothee, *et al.*) 9: 547
— Seasonal temperature-salinity changes and thermocline development in the Mid-Atlantic Bight as recorded by the isotopic composition of bivalves
(Arthur, Michael A., *et al.*) 11: 655

carbonate rocks *see under* sedimentary rocks

carbonates *see under* minerals

Caribbean region *see also* the individual countries

Caribbean region—oceanography
mud volcanoes: Long decollements and mud volcanoes; evidence from the Barbados Ridge Complex for the role of high pore-fluid pressure in the development of an accretionary complex
(Westbrook, G. K., *et al.*) 5: 279

Caribbean region—tectonophysics
plate tectonics: La Desirade Island (Lesser Antilles) revisited; Lower Cretaceous radiolarian cherts and arguments against an ophiolitic origin for the basal complex
(Bouysse, Philippe, *et al.*) 4: 244
— Long decollements and mud volcanoes; evidence from the Barbados Ridge Complex for the role of high pore-fluid pressure in the development of an accretionary complex
(Westbrook, G. K., *et al.*) 5: 279
— Post-Miocene Cayman Trough evolution; a speculative model
(Holcombe, Troy L., *et al.*) 12: 714

Caribbean Sea—tectonophysics
sea-floor spreading: Post-Miocene Cayman Trough evolution; a speculative model
(Holcombe, Troy L., *et al.*) 12: 714

Carpathians *see also* the individual countries

Cenozoic *see also* Neogene; Paleocene; Tertiary; *see also under* geochronology *under* California

Central America *see also* Nicaragua

Cephalopoda *see under* Mollusca

changes of level *see also under* geomorphology *under* New Zealand; *see also under* stratigraphy *under* Pacific Ocean

changes of level—processes
deep-sea sedimentation: Eustatic control of turbidites and winnowed turbidites; discussions and reply
(Mullins, Henry T., *et al.*) 1: 57

China—oceanography
continental shelf: Concepts of sediment deposition and accumulation applied to the continental shelf near the mouth of the Yangtze River
(McKee, Brent A., *et al.*) 11: 631

China—stratigraphy
Cambrian: Cambrian cephalopods
(Chen Jun-yuan, *et al.*) 11: 647

clastic rocks *see under* sedimentary rocks

clastic sediments *see under* sediments

climate, ancient *see* paleoclimatology

coal *see also under* economic geology *under* Utah; *see also under* organic residues *under* sedimentary rocks

Coelenterata *see also* corals

Colorado—petrology
igneous rocks: Large wave forms from the Fish Canyon Tuff, Colorado
(Self, S., *et al.*) 8: 443
magmas: Igneous sulfides in the Fish Canyon Tuff and the role of sulfur in calc-alkaline magmas
(Whitney, James A., *et al.*) 2: 99

Colorado Plateau *see also* the individual states

Colorado Plateau—structural geology
neotectonics: Recent seismicity near Capitol Reef National Park, Utah, and its tectonic implications
(Humphrey, James R., *et al.*) 8: 447

Colorado Plateau—tectonophysics
crust: Tectonic implications of mid-Tertiary dikes in west-central New Mexico
(Laughlin, A. W., *et al.*) 1: 45

Columbia Plateau *see also* the individual states

Columbia Plateau—geochemistry
trace elements: Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt
(Nelson, Dennis O.) 4: 248
— Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt; discussion and reply
(Carlson, Richard W., *et al.*) 12: 735

conglomerate *see also under* clastic rocks *under* sedimentary rocks

congresses *see* symposia

conodonts—biostratigraphy
Ordovician: Ordovician conodonts from metamorphosed carbonates of the Salton Trough, California
(Miller, Richard H., *et al.*) 7: 410

continental drift—Gondwana
Antarctica: The Antarctic Plate; a global perspective
(Dalziel, Ian W. D., *et al.*) 2: 118
Western Hemisphere: Amazon Rift and Pisco-Jurua Fault; their relation to the separation of North America from Gondwana
(Szatmari, Peter) 5: 300

continental drift—paleomagnetism
polar wandering: Drifting along with a wandering polar curve
(Beaty, Chester B.) 11: 672

continental shelf *see also* marine geology; *see also under* oceanography *under* China; New Jersey

continental slope *see also* marine geology; *see also under* oceanography *under* New Jersey

copper ores *see also under* economic geology *under* Montana

copper ores—genesis
ore-forming fluids: Origin of fluids and metals in porphyry and epithermal mineral deposits
(LeAnderson, Jim, *et al.*) 9: 557

corals—biogeography
Paleozoic: Corals from a dismembered late Paleozoic paleo-Pacific plateau
(Stevens, Calvin H.) 10: 603

Cretaceous *see also under* stratigraphy *under* Arizona; California; Lesser Antilles; Utah

Cretaceous—stratigraphy
boundary: Spheroids at the Cretaceous-Tertiary boundary are altered impact droplets of basaltic composition
(Montanari, Alessandro, *et al.*) 11: 668

crust *see also under* seismology *under* Appalachians; Atlantic Coastal Plain; Atlantic Ocean; Basin and Range Province; New Zealand; Oklahoma; Rocky Mountains; United States; *see also under* tectonophysics *under* Appalachians; Colorado Plateau; Ecuador; Great Basin; Great Lakes region; Great Plains; Midwest; Newfoundland; North America; Oman; Precambrian; symposia

crust—thickness
oceanic crust: Role of a thin, komatiite-rich oceanic crust in the Archean plate-tectonic process
(Arndt, Nicholas T.) 7: 372

crystal chemistry *see also* crystal growth; minerals

crystal growth *see also* minerals

crystal growth—carbonates
calcite: Mineralogical and paramorphic textural changes generated in modern ooids by heat and compaction
(Bhattacharyya, Ajit, *et al.*) 10: 596
— Origin of calcite in syntectonic veins as determined from carbon-isotope ratios
(Dietrich, Dorothee, *et al.*) 9: 547

crystal growth—framework silicates
mechanism: Simultaneous crystallization of quartz-feldspar intergrowths from granitic magmas
(Carstens, Harald) 6: 339

crystal growth—framework silicates, plagioclase
overgrowths: Growth of a zoned plagioclase porphyroblast in a mylonite
(Wintsch, Robert P., *et al.*) 6: 360

crystal structure *see also* crystal growth; minerals

Cyprus—geochemistry
trace elements: Nd-Sr isotopic study of primitive lavas from the Troodos ophiolite, Cyprus; evidence for a subduction-related setting
(McCulloch, M. T., *et al.*) 12: 727

Cyprus—petrology
igneous rocks: Troodos extrusive series of Cyprus; a comparison with oceanic crust
(Schmincke, Hans-Ulrich, *et al.*) 7: 405
— Volcanic glass compositions of the Troodos ophiolite, Cyprus
(Robinson, Paul T., *et al.*) 7: 400

deep seismic sounding *see under* crust *under* seismology

deformation *see also* geophysics; structural analysis

deformation—field studies
shear: Role of shear in development of the Helvetic fold-thrust belt of Switzerland
(Ramsay, John G., *et al.*) 8: 439
strain: Growth of a zoned plagioclase porphyroblast in a mylonite
(Wintsch, Robert P., *et al.*) 6: 360

deformation—theoretical studies
stress: Differential stress magnitudes during regional deformation and metamorphism; upper bound imposed by tensile fracturing
(Etheridge, M. A.) 4: 231

deposition of ores *see* mineral deposits, genesis

Devonian *see also under* geochronology *under* New York; *see also under* stratigraphy *under* Michigan; Nevada

diabase *see under* igneous rocks

diagenesis *see also* sedimentation

diagenesis—dolomitization
fabric: Evidence for primary aragonite precipitation, lower Proterozoic (1.9-Ga) Rocknest Dolomite, Wopmay Orogen, Northwest Canada
(Grotzinger, J. P., *et al.*) 12: 710
indicators: Burial dolomitization in the Lost Burro Formation (Devonian), east-central California, and the significance of late diagenetic dolomitization
(Zenger, Donald H.) 9: 519

diagenesis—effects
remanent magnetization: Diagenetic magnetite carries ancient yet secondary remanence in some Paleozoic sedimentary carbonates
(McCabe, Chad, *et al.*) 4: 221

diagenesis—environment
submarine environment: Neptunic dikes and their relation to the hydrodynamic circulation of submarine hydrothermal systems
(Hsu, Kenneth J.) 8: 455

diagenesis—experimental studies
carbonate rocks: Mineralogical and paramorphic textural changes generated in modern ooids by heat and compaction
(Bhattacharyya, Ajit, *et al.*) 10: 596

diagenesis—materials
reservoir rocks: Models of diagenesis in clastic reservoirs
(Wood, J., *et al.*) 3: 187

diagenesis—processes
cyclic processes: Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335
evolution: Fluid inclusion petrography and tectonic-burial history of the Al Ali No. 2 well; evidence for the timing of diagenesis and oil migration, northern Oman Foredeep
(Burruss, R. C., *et al.*) 10: 567

diastrophism *see* orogeny

differentiation *see under* magmas

dikes *see under* intrusions

dinosaurs *see under* Reptilia

dolomitization *see under* diagenesis

dolostone *see also under* carbonate rocks *under* sedimentary rocks

drainage patterns *see under* fluvial features *under* geomorphology

Earth—evolution
processes: Perspectives from Earth
(Lucchitta, Ivo) 12: 691

earthquakes *see under* geologic hazards; seismology; *see also* engineering geology; seismology; *see also under* seismology *under* California; Nebraska; South Dakota; United States; Utah

earthquakes—prediction
current research: Earthquake prediction
(Allen, Clarence R.) 12: 682

East China Sea—oceanography
sedimentation: Concepts of sediment deposition and accumulation applied to the continental shelf near the mouth of the Yangtze River
(McKee, Brent A., *et al.*) 11: 631

Eastern Hemisphere *see also* Antarctic Ocean; Antarctica; Arctic Ocean; Asia; Atlantic Ocean

Eastern U.S. *see also* Georgia; New Jersey; New York; North Carolina; Pennsylvania; South Carolina

ecology—mollusks
marine environment: Seasonal temperature-salinity changes and thermocline development in the Mid-Atlantic Bight as recorded by the isotopic composition of bivalves
(Arthur, Michael A., *et al.*) 11: 655

ecology—Ostracoda
lacustrine environment: Relationship of two lacustrine ostracode species to solute composition and salinity; implications for paleohydrochemistry
(Forester, Richard M.) 8: 435

economic geology—practice
current research: Mineral deposits
(Skinner, Brian J.) 12: 685

economic geology—symposia
metal ores: Origin of fluids and metals in porphyry and epithermal mineral deposits
(LeAnderson, Jim, *et al.*) 9: 557
metallogeny: Hydrodynamics and geochemistry of ore generation in sedimentary environments
(Kelly, William C., *et al.*) 5: 309

Ecuador—tectonophysics
crust: Simple Bouguer gravity anomaly field and the inferred crustal structure of continental Ecuador
(Feininger, Tomas, *et al.*) 1: 40

Egypt—geochronology
Proterozoic: Geology and origin of Meatiq Dome, Egypt; a Precambrian metamorphic core complex?
(Sturchio, Neil C., *et al.*) 2: 72

Egypt—geophysical surveys
remote sensing: Application of Landsat multispectral scanner data and sediment spectral reflectance measurements to mapping of the Meatiq Dome, Egypt
(Jacobberger, P. A., *et al.*) 10: 587

Egypt—structural geology
tectonics: Geology and origin of Meatiq Dome, Egypt; a Precambrian metamorphic core complex?
(Sturchio, Neil C., *et al.*) 2: 72

engineering geology *see also* deformation; environmental geology; geodesy; geophysical methods; rock mechanics; waste disposal

engineering geology—practice
current research: Engineering geology
(Schuster, Robert L.) 12: 684

environmental geology *see also* ecology; engineering geology; waste disposal

environmental geology—practice
current research: Environmental geology
(Rold, John W.) 12: 689

Eocene *see also under* geochronology *under* Washington; *see also under* stratigraphy *under* Gulf of Mexico

epeirogeny *see also* orogeny

erosion *see under* processes *under* geomorphology

erosion features *see under* geomorphology

eruptive rocks *see* igneous rocks

Europe *see also* Alps; Greece; Scotland; Spain; Switzerland; Wales

experimental studies *see under* diagenesis; *see under* racemization *under* geochronology

extraterrestrial geology—concepts
exploration: Planetary geology
(Lucchitta, Baerbel K.) 12: 682

Far East *see also* the individual countries

Far East—structural geology
tectonics: Comparison of terrane accretion in modern Southeast Asia and the Mesozoic North American Cordillera
(Silver, Eli A., *et al.*) 4: 198

faulting *see* faults

faults *see also* folds

faults—displacements
overthrust faults: COCORP profiling across the Southern Oklahoma Aulacogen; overthrusting of the Wichita Mountains and compression within the Anadarko Basin
(Brewer, J. A., *et al.*) 2: 109
strike-slip faults: Cenozoic convergence along the California coast; a qualitative test of the hot-spot approximation; discussion and reply
(Nilsen, Tor H., *et al.*) 11: 673
— Displacements on late Cenozoic strike-slip faults of the central Mojave Desert, California
(Dokka, Roy K.) 5: 305
— Scale and timing of movements on the Great Glen Fault, Scotland
(Smith, D. I., *et al.*) 9: 523
— Tectonic implications of a late Mesozoic fold and thrust belt in northwestern Nevada
(Oldow, John S.) 9: 542
thrust faults: Depth migration and interpretation of the COCORP Wind River, Wyoming, seismic reflection data
(Lynn, Heloise Bloxsom, *et al.*) 8: 462
— Extensional tectonics in the Death Valley area, California; transport of the Panamint Range structural block 80 km northwestward
(Stewart, John H.) 3: 153
— Mid-Paleozoic age of the Roberts thrust unsettled by new data from northern Nevada; discussion and reply
(Johnson, J. G., *et al.*) 1: 60
— Mid-Paleozoic age of the Roberts thrust unsettled by new data from northern Nevada; discussion and reply
(Drowley, David, *et al.*) 10: 617
— Role of shear in development of the Helvetic fold-thrust belt of Switzerland
(Ramsay, John G., *et al.*) 8: 439
transcurrent faults: Devonian-Mississippian sinistral transcurrent faulting along the cratonic margin of western North America; a hypothesis
(Eisbacher, G. H.) 1: 7
transform faults: Multiple, closely spaced transform faults in fast-slipping fracture zones
(Searle, R. C.) 10: 607

faults—distribution
Basin and Range Province: Cenozoic and Mesozoic structure of the eastern Basin and Range Province, Utah, from COCORP seismic-reflection data
(Allmendinger, Richard W., *et al.*) 9: 532
systems: Amazon Rift and Pisco-Jurua Fault; their relation to the separation of North America from Gondwana
(Szatmari, Peter) 5: 300

faults—effects
mylonites: Growth of a zoned plagioclase porphyroblast in a mylonite
(Wintsch, Robert P., *et al.*) 6: 360
— Melt origin of fault-generated pseudotachylytes demonstrated by textures
(Maddock, R. H.) 2: 105
— Seismic velocity and anisotropy in mylonites and the reflectivity of deep crustal fault zones; discussion and reply
(Etheridge, M. A., *et al.*) 8: 487
shear zones: Magnitude of crustal extension in the southern Great Basin; discussion and reply
(Royse, Frank, *et al.*) 8: 495
— Shear-zone model for the origin of metamorphic core complexes
(Davis, George H.) 6: 342

faults—systems
block structures: Model for the origin of the Yakutat Block, an accreting terrane in the northern Gulf of Alaska
(Bruns, Terry R.) 12: 718

fission-track dating *see under* geochronology

fluid inclusions *see also* inclusions

fluid inclusions—genesis
hydration: Water exsolution from quartz; implications for the generation of retrograde metamorphic fluids
(Spear, Frank S., *et al.*) 2: 82

fluid inclusions—interpretation
diagenesis: Fluid inclusion petrography and tectonic-burial history of the Al Ali No. 2 well; evidence for the timing of diagenesis and oil migration, northern Oman Foredeep
(Burruss, R. C., *et al.*) 10: 567

fluvial features *see under* geomorphology

folding *see* folds

folds *see also* faults; foliation

folds—orientation
nappes: Emplacement of a fold-nappe, Betic Orogen, southern Spain; discussion and reply
(Torres-Roldan, R. L., *et al.*) 7: 426
— Role of shear in development of the Helvetic fold-thrust belt of Switzerland
(Ramsay, John G., *et al.*) 8: 439

folds—style
anticlines: Depth migration and interpretation of the COCORP Wind River, Wyoming, seismic reflection data
(Lynn, Heloise Bloxsom, *et al.*) 8: 462
antiform folds: Geology and origin of Meatiq Dome, Egypt; a Precambrian metamorphic core complex?
(Sturchio, Neil C., *et al.*) 2: 72
isoclinal folds: Complex refolding history of the Pelona, Orocopia, and Rand schists, Southern California
(Jacobson, Carl E.) 10: 583

foliation *see also* folds; structural analysis

foliation—style
schistosity: Complex refolding history of the Pelona, Orocopia, and Rand schists, Southern California
(Jacobson, Carl E.) 10: 583

foraminifera *see also* foraminifers

foraminifers—biochemistry
isotopes: Isotope-plankton comparisons in a late Quaternary core with a stable temperature history
(Crowley, T. J., *et al.*) 5: 275
— Quaternary aragonite cycles and oxygen-isotope record in Bahamian carbonate ooze
(Droxler, A. W., *et al.*) 4: 235

foraminifers—biostratigraphy
Pleistocene: Baffin Bay; present-day analog of the central Arctic during late Pliocene to mid-Pleistocene time
(Herman, Yvonne) 6: 356
Tertiary: Late Oligocene-early Miocene glacial record of the Ross Sea, Antarctica; evidence from DSDP Site 270
(Leckie, R. Mark, *et al.*) 10: 578

fossils *see* appropriate fossil group
fossils, problematic *see* problematic fossils
foundations *see also* rock mechanics
fractures—distribution
carbonate rocks: Fluid inclusion petrography and tectonic-burial history of the Al Ali No. 2 well; evidence for the timing of diagenesis and oil migration, northern Oman Foredeep
(Burruss, R. C., *et al.*) 10: 567
framework silicates *see under* minerals
fuel resources *see also under* economic geology *under* United States
gabbros *see under* igneous rocks
gas inclusions *see* fluid inclusions
genesis of ore deposits *see* mineral deposits, genesis
geochemistry—processes
fixation: Evolutionary and geologic consequences of organic carbon fixing in the primitive anoxic ocean
(Berry, W. B. N., *et al.*) 3: 141
hydration: Water exsolution from quartz; implications for the generation of retrograde metamorphic fluids
(Spear, Frank S., *et al.*) 2: 82
solution: Mechanics and kinetics of incongruent feldspar dissolution
(Gardner, Leonard Robert) 7: 418
geochronology *see also* absolute age
geochronology—fission-track dating
apatite: Radiometric dating of ash partings in coal of the Eocene Puget Group, Washington; implications for paleobotanical stages
(Turner, Donald L., *et al.*) 9: 527
— Uplift rate of Adirondack anorthosite measured by fission-track analysis of apatite
(Miller, Donald S., *et al.*) 5: 284
depth indicators: Fission-track analysis of apatite and zircon defines a burial depth of 4 to 7 km for lowermost Upper Devonian, Catskill Mountains, New York
(Lakatos, Stephen, *et al.*) 2: 103
zircon: Rates of late Cenozoic tectonism in the Vallecito-Fish Creek basin, western Imperial Valley, California
(Johnson, Noye M., *et al.*) 11: 664
geochronology—paleomagnetism
magnetostratigraphy: Marine magnetic anomaly 33-34 identified in the Upper Cretaceous of the Great Valley Sequence of California
(Ward, Peter D., *et al.*) 2: 90
reversals: Short-period geomagnetic excursion recorded in Pleistocene sediments of Baffin Bay and Davis Strait
(Aksu, A. E.) 9: 537
geochronology—racemization
experimental studies: Intrashell variations in amino acid concentrations and isoleucine epimerization ratios in fossil Hiatella arctica
(Brigham, Julie K.) 9: 509
geochronology—time scales
Oligocene: Oligocene calibration of the magnetic polarity time scale; discussion and reply
(Ness, Gordon E., *et al.*) 7: 429
Phanerozoic: The Decade of North American Geology 1983 geologic time scale
(Palmer, Allison R.) 9: 503
Precambrian: The Decade of North American Geology 1983 geologic time scale
(Palmer, Allison R.) 9: 503
geodesy—surveys
California: Tectonic preservation of the divide between the Salton Basin and the Gulf of California
(Gilmore, Thomas D., *et al.*) 8: 474
geologic hazards *see also under* environmental geology *under* New Zealand; Washington
geologic hazards—earthquakes
prediction: Earthquake prediction
(Allen, Clarence R.) 12: 682
geologic time *see* absolute age; geochronology
geology—philosophy
Earth: Perspectives from Earth
(Lucchitta, Ivo) 12: 691
geology—practice
history: Geology; past and future
(Moores, E. M.) 12:
— Geology; past and future; overview
(Maxwell, John C.) 12: 679
policy: Geology and public policy
(Grew, Priscilla C.) 12: 681
publications: Science publishing
(Spall, Henry) 12: 690
geology—principles
uniformitarianism: Twelve fallacies of uniformitarianism; discussions and reply
(Scharnberger, C. K., *et al.*) 5: 312
— Uniformitarianism under scrutiny
(Hsu, Kenneth J.) 12: 683
geomorphology *see also* glacial geology
geomorphology—erosion features
cliffs: Use of packrat middens to determine rates of cliff retreat in the eastern Grand Canyon, Arizona; discussions and replies
(Hose, Louise D., *et al.*) 5: 314
— Use of packrat middens to determine rates of cliff retreat in the eastern Grand Canyon, Arizona; discussion and reply
(Smith, Bernard J., *et al.*) 8: 494
geomorphology—fluvial features
drainage patterns: Influence of the Onion Creek salt diapir on the late Cenozoic history of Fisher Valley, southeastern Utah
(Colman, Steven M.) 4: 240
islands: Shapes of streamlined islands on Earth and Mars; experiments and analyses of the minimum-drag form
(Komar, Paul D.) 11: 651
geomorphology—impact features
meteor craters: Concentrically zoned pattern in the Bouguer gravity anomaly map of northeastern North America; discussion and reply
(Briggs, Reginald P., *et al.*) 5: 318
geomorphology—landform evolution
tectonic controls: Tectonic preservation of the divide between the Salton Basin and the Gulf of California
(Gilmore, Thomas D., *et al.*) 8: 474
geomorphology—mass movements
avalanches: Frequency and hazard of large rock avalanches in the central Southern Alps, New Zealand
(Whitehouse, Ian E., *et al.*) 6: 331
geomorphology—processes
erosion: Drainage systems developed by sapping on Earth and Mars; discussions and reply
(Stiller, David, *et al.*) 1: 54
geomorphology—shore features
wave-cut platforms: Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California
(McLaughlin, R. J., *et al.*) 1: 35
— Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California; discussion and reply
(Morner, N. A., *et al.*) 10: 621
geomorphology—volcanic features
calderas: Nested calderas and trapdoor uplift at Pantelleria, Strait of Sicily
(Mahood, Gail, *et al.*) 12: 722
geophysical methods—seismic methods
interpretation: Depth migration and interpretation of the COCORP Wind River, Wyoming, seismic reflection data
(Lynn, Heloise Bloxsom, *et al.*) 8: 462
— Reprocessed COCORP Southern Appalachian reflection data; root zone to coastal plain
(Iverson, William P., *et al.*) 7: 422
geophysical surveys *see under* Atlantic Ocean; automatic data processing; Egypt; Georgia; Gulf of Mexico; Kansas; Minnesota; New Zealand; Oklahoma; Pacific Ocean; Utah; Wisconsin; Wyoming; *see* acoustical sur-

veys *under* geophysical surveys *under* Atlantic Ocean; Pacific Ocean; *see* magnetic surveys *under* geophysical surveys *under* Minnesota; Wisconsin; *see* seismic surveys *under* geophysical surveys *under* Atlantic Ocean; automatic data processing; Georgia; Gulf of Mexico; Kansas; New Zealand; Oklahoma; Utah; Wyoming; *see also* geophysical methods

geophysics *see also* deformation; engineering geology

geophysics—practice
current research: Solid earth geophysics
(Anderson, Don L.) 12: 680

Georgia—geophysical surveys
seismic surveys: Reprocessed COCORP Southern Appalachian reflection data; root zone to coastal plain
(Iverson, William P., *et al.*) 7: 422

geosynclines *see also* orogeny

geosynclines—evolution
Cordilleran Geosyncline: Subsidence analysis of the Cordilleran miogeocline; implications for timing of late Proterozoic rifting and amount of extension
(Armin, Richard A., *et al.*) 12: 702

geotechnics *see* engineering geology

geothermal energy *see also under* economic geology *under* Hawaii

geothermics *see* heat flow

glacial geology *see also* geomorphology

glacial geology—ancient ice ages
Proterozoic: Glaciomarine model for upper Precambrian diamictites of the Port Askaig Formation, Scotland
(Eyles, Carolyn H., *et al.*) 12: 692

glacial geology—glaciation
deglaciation: Sedimentation in a large lake; a reinterpretation of the late Pleistocene stratigraphy at Scarborough Bluffs, Ontario, Canada
(Eyles, Carolyn H., *et al.*) 3: 146
periodicity: Late Quaternary U-series speleothem growth record from southeastern Minnesota
(Lively, R. S.) 5: 259

glacial geology—glaciers
ice movement: Radiocarbon-dated evidence of worldwide early Holocene climate change
(Beget, James E.) 7: 389

glaciation *see under* glacial geology

glaciers *see under* glacial geology

Gondwana *see under* continental drift

Great Basin *see also* the individual states

Great Basin—stratigraphy
Cambrian: Precambrian-Cambrian transition problem in western North America; Part I, Tommotian fauna in the southwestern Great Basin and its implications for the base of the Cambrian System
(Mount, Jeffrey F., *et al.*) 4: 224

Great Basin—tectonophysics
crust: Magnitude of crustal extension in the southern Great Basin; discussion and reply
(Royse, Frank, *et al.*) 8: 495

Great Britain *see also* Scotland; Wales

Great Lakes region *see also* the individual states and provinces

Great Lakes region—stratigraphy
Pleistocene: Sedimentation in a large lake; a reinterpretation of the late Pleistocene stratigraphy at Scarborough Bluffs, Ontario, Canada
(Eyles, Carolyn H., *et al.*) 3: 146

Great Lakes region—tectonophysics
crust: Correlation of magnetic anomalies in east-central Minnesota and northwestern Wisconsin; constraints on magnitude and direction of Keweenawan rifting
(Chandler, Val W.) 3: 174

Great Plains *see also* the individual states and provinces

Great Plains—tectonophysics
crust: Proterozoic structural provinces in the north-central United States
(Dutch, Steven I.) 8: 478

Greece—volcanology
Santorini: Flow-head deposits in ash turbidites
(Sparks, R. S. J., *et al.*) 6: 348

Greenland—structural geology
tectonics: Evolution of the early Paleozoic deep-water basin of North Greenland; aulacogen or narrow ocean?
(Surlyk, Finn, *et al.*) 2: 77

ground water *see also* hydrogeology; hydrology

Gulf Coastal Plain *see also* the individual states and countries

Gulf Coastal Plain—structural geology
salt tectonics: Geometry and evolution of salt structures in a marginal rift basin of the Gulf of Mexico, East Texas
(Jackson, M. P. A., *et al.*) 3: 131

Gulf of Mexico—geophysical surveys
seismic surveys: Deep-sea erosional unconformity in the southeastern Gulf of Mexico
(Angstadt, D. M., *et al.*) 4: 215

Gulf of Mexico—stratigraphy
Eocene: Deep-sea erosional unconformity in the southeastern Gulf of Mexico
(Angstadt, D. M., *et al.*) 4: 215

Gulf of Mexico—tectonophysics
plate tectonics: Geometry and evolution of salt structures in a marginal rift basin of the Gulf of Mexico, East Texas
(Jackson, M. P. A., *et al.*) 3: 131

Hawaii—economic geology
geothermal energy: Distribution of differentiated tholeiitic basalts on the lower East Rift Zone of Kilauea Volcano, Hawaii; a possible guide to geothermal exploration
(Moore, Richard B.) 3: 136

heat flow—thermal conductivity
mantle: Liquid carbon in the lower mantle?
(Dickey, John S., Jr., *et al.*) 4: 219

helium—isotopes
He-4/He-3: Earth degassing, mantle metasomatism, and isotopic evolution of the mantle
(Vollmer, R.) 8: 452

Himalayas *see also* the individual countries

Holocene *see also under* geochronology *under* Jamaica

Holocene—stratigraphy
paleoclimatology: Radiocarbon-dated evidence of worldwide early Holocene climate change
(Beget, James E.) 7: 389

hydrocarbons *see under* organic materials

hydrogeology *see also* hydrology

hydrogeology—practice
current research: Hydrogeology
(Anderson, Mary P.) 12: 685

hydrology *see also* hydrogeology

hydrology—limnology
hydrochemistry: Relationship of two lacustrine ostracode species to solute composition and salinity; implications for paleohydrochemistry
(Forester, Richard M.) 8: 435

hydrothermal processes *see under* processes *under* mineral deposits, genesis

Iberian Peninsula *see also* Spain

ice ages *see* glacial geology

ichnofossils—occurrence
Precambrian: Are these the oldest metazoan trace fossils?; discussion and reply
(Cloud, Preston, *et al.*) 10: 618

Idaho—economic geology
silver ores: Genesis of the sandstone (Revett) type of copper-silver occurrences in the Belt Supergroup of northwestern Montana and northeastern Idaho
(Lange, Ian M., *et al.*) 11: 643

Idaho—geochemistry
trace elements: Seven Devils terrane; is it really a piece of Wrangellia?
(Sarewitz, Daniel) 11: 634

igneous rocks *see also* fluid inclusions; inclusions; intrusions; lava; magmas; metamorphic rocks; metasomatism; phase equilibria
igneous rocks—andesites
composition: Tectonic implications of mid-Tertiary dikes in west-central New Mexico
(Laughlin, A. W., *et al.*) 1: 45
igneous rocks—basalts
composition: Active hydrothermal vents and sulfide deposits on the southern Juan de Fuca Ridge
(Normark, William R., *et al.*) 3: 158
tholeiitic basalt: Distribution of differentiated tholeiitic basalts on the lower East Rift Zone of Kilauea Volcano, Hawaii; a possible guide to geothermal exploration
(Moore, Richard B.) 3: 136
— Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt
(Nelson, Dennis O.) 4: 248
— Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt; discussion and reply
(Carlson, Richard W., *et al.*) 12: 735
igneous rocks—diabase
genesis: Geochemistry and tectonic affinities of a Proterozoic bimodal igneous suite, West Texas
(Rudnick, Roberta L.) 6: 352
geochemistry: Juxtaposed Mesozoic diabase dike sets from the Carolinas; a preliminary assessment
(Ragland, Paul C., *et al.*) 7: 394
igneous rocks—gabbros
anorthosite: Origin and age of Adirondack anorthosites re-evaluated with Nd isotopes
(Basu, Asish R., *et al.*) 9: 514
igneous rocks—geochemistry
isotopes: Nd-Sr isotopic study of primitive lavas from the Troodos ophiolite, Cyprus; evidence for a subduction-related setting
(McCulloch, M. T., *et al.*) 12: 727
igneous rocks—petrology
current research: Igneous rocks
(McBirney, Alexander R.) 12: 688
igneous rocks—plutonic rocks
distribution: Tectonic accretion and the origin of the two major metamorphic and plutonic welts in the Canadian Cordillera; discussion and reply
(Brew, David A., *et al.*) 7: 427
igneous rocks—pyroclastics
ash-flow tuff: Chemical differentiation of the Bishop Tuff and other high-silica magmas through crystallization processes
(Michael, Peter J.) 1: 31
— Chemical differentiation of the Bishop Tuff and other high-silica magmas through crystallization processes; discussion and reply
(Hildreth, Wes, *et al.*) 10: 622
— Large wave forms from the Fish Canyon Tuff, Colorado
(Self, S., *et al.*) 8: 443
ignimbrite: Grain orientation and depositional ramps as flow direction indicators of a large-scale pyroclastic flow deposit in Japan; discussion and reply
(Varga, Robert J., *et al.*) 3: 188
scoria: Plinian airfall deposits of basaltic composition
(Williams, Stanley N.) 4: 211
— Plinian airfall deposits of basaltic composition; discussion and reply
(Bice, David C., *et al.*) 10: 616
textures: Mount St. Helens 1980 and Mount Pelee 1902; flow or surge?
(Walker, George P. L., *et al.*) 10: 571
tuff: Igneous sulfides in the Fish Canyon Tuff and the role of sulfur in calc-alkaline magmas
(Whitney, James A., *et al.*) 2: 99
— Natrocarbonatite tephra of Kerimasi Volcano, Tanzania
(Hay, Richard L.) 10: 599
igneous rocks—textures
intergrowths: Simultaneous crystallization of quartz-feldspar intergrowths from granitic magmas
(Carstens, Harald) 6: 339
igneous rocks—ultramafics
kimberlite: Tectonic model for kimberlite emplacement in the Appalachian Plateau of Pennsylvania; discussion and reply
(Dennison, John M., *et al.*) 4: 252
ophiolite: Composition of the Samail ocean crust
(Pallister, John S., *et al.*) 11: 638
— On the ophiolite trail
(Moores, Eldridge M.) 1: 53
— Volcanic glass compositions of the Troodos ophiolite, Cyprus
(Robinson, Paul T., *et al.*) 7: 400
igneous rocks—volcanic rocks
composition: Origin of K_2O-SiO_2 trends in volcanoes of the Mariana Arc
(Meijer, Arend, *et al.*) 2: 67
genesis: Geodynamic significance of Late Triassic to Early Cretaceous volcanic sequences of Vizcaino Peninsula and Cedros Island, Baja California, Mexico
(Rangin, C., *et al.*) 9: 552
— Nested calderas and trapdoor uplift at Pantelleria, Strait of Sicily
(Mahood, Gail, *et al.*) 12: 722
geochemistry: Troodos extrusive series of Cyprus; a comparison with oceanic crust
(Schmincke, Hans-Ulrich, *et al.*) 7: 405
ignimbrite *see under* pyroclastics *under* igneous rocks
impact features *see under* geomorphology
incertae sedis *see* problematic fossils
inclusions *see also* fluid inclusions
inclusions—mineral inclusions
pyrrhotite: Igneous sulfides in the Fish Canyon Tuff and the role of sulfur in calc-alkaline magmas
(Whitney, James A., *et al.*) 2: 99
intrusions *see also* igneous rocks; metamorphism; metasomatism
intrusions—dikes
emplacement: Structural evidence for dikes beneath silicic domes, Medicine Lake Highland Volcano, California
(Fink, Jonathan H., *et al.*) 8: 458
— Tectonic implications of mid-Tertiary dikes in west-central New Mexico
(Laughlin, A. W., *et al.*) 1: 45
orientation: Juxtaposed Mesozoic diabase dike sets from the Carolinas; a preliminary assessment
(Ragland, Paul C., *et al.*) 7: 394
intrusions—emplacement
tectonic controls: Tectonic model for kimberlite emplacement in the Appalachian Plateau of Pennsylvania; discussion and reply
(Dennison, John M., *et al.*) 4: 252
intrusions—laccoliths
occurrence: Laccoliths(?) and small volcanoes on the flank of the East Pacific Rise
(Lonsdale, Peter) 12: 706
Invertebrata *see also* ichnofossils; Mollusca; Ostracoda; problematic fossils; worms
invertebrates *see also* conodonts; corals; foraminifers; mollusks; radiolarians
isotope dating *see* absolute age
isotopes *see also* absolute age; geochronology
isotopes—carbon
C-13/C-12: Limestone and the problem of radiocarbon dating of land-snail shell carbonate
(Goodfriend, Glenn A., *et al.*) 10: 575
— Origin of calcite in syntectonic veins as determined from carbon-isotope ratios
(Dietrich, Dorothee, *et al.*) 9: 547

isotopes—fractionation
mantle: Earth degassing, mantle metasomatism, and isotopic evolution of the mantle
(Vollmer, R.) 8: 452

isotopes—igneous rocks
ophiolite: Nd-Sr isotopic study of primitive lavas from the Troodos ophiolite, Cyprus; evidence for a subduction-related setting
(McCulloch, M. T., *et al.*) 12: 727

isotopes—neodymium
Nd-144/Nd-143: Origin and age of Adirondack anorthosites re-evaluated with Nd isotopes
(Basu, Asish R., *et al.*) 9: 514

isotopes—oxygen
O-18/O-16: Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt
(Nelson, Dennis O.) 4: 248
— Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt; discussion and reply
(Carlson, Richard W., *et al.*) 12: 735
— Isotope-plankton comparisons in a late Quaternary core with a stable temperature history
(Crowley, T. J., *et al.*) 5: 275
— Quaternary aragonite cycles and oxygen-isotope record in Bahamian carbonate ooze
(Droxler, A. W., *et al.*) 4: 235

isotopes—sedimentary rocks
carbonate rocks: Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335

isotopes—sediments
marine sediments: Concepts of sediment deposition and accumulation applied to the continental shelf near the mouth of the Yangtze River
(McKee, Brent A., *et al.*) 11: 631

Italy—petrology
volcanism: Nested calderas and trapdoor uplift at Pantelleria, Strait of Sicily
(Mahood, Gail, *et al.*) 12: 722

Italy—sedimentary petrology
sediments: Spheroids at the Cretaceous-Tertiary boundary are altered impact droplets of basaltic composition
(Montanari, Alessandro, *et al.*) 11. 668

Jamaica—geochronology
Holocene: Limestone and the problem of radiocarbon dating of land-snail shell carbonate
(Goodfriend, Glenn A., *et al.*) 10: 575

Japan—petrology
igneous rocks: Grain orientation and depositional ramps as flow direction indicators of a large-scale pyroclastic flow deposit in Japan; discussion and reply
(Varga, Robert J., *et al.*) 3: 188

Kansas—geophysical surveys
seismic surveys: Intracrustal complexity in the United States Midcontinent; preliminary results from COCORP surveys in northeastern Kansas
(Brown, L., *et al.*) 1: 25

laccoliths *see under* intrusions

landform evolution *see under* geomorphology

lava *see also* igneous rocks; magmas

lava—composition
chemical composition: Origin of K_2O-SiO_2 trends in volcanoes of the Mariana Arc
(Meijer, Arend, *et al.*) 2: 67

lava—distribution
lava flows: Distribution of differentiated tholeiitic basalts on the lower East Rift Zone of Kilauea Volcano, Hawaii; a possible guide to geothermal exploration
(Moore, Richard B.) 3: 136

lava—genesis
magmas: Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt
(Nelson, Dennis O.) 4: 248
— Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt; discussion and reply
(Carlson, Richard W., *et al.*) 12: 735
paleoenvironment: Characteristics, depositional environment, and tectonic interpretations of the Proterozoic Cardenas Lavas, eastern Grand Canyon, Arizona
(Lucchitta, Ivo, *et al.*) 3: 177
subduction zones: Volcanic glass compositions of the Troodos ophiolite, Cyprus
(Robinson, Paul T., *et al.*) 7: 400

lava—geochemistry
isotopes: Nd-Sr isotopic study of primitive lavas from the Troodos ophiolite, Cyprus; evidence for a subduction-related setting
(McCulloch, M. T., *et al.*) 12: 727
trace elements: Geodynamic significance of Late Triassic to Early Cretaceous volcanic sequences of Vizcaino Peninsula and Cedros Island, Baja California, Mexico
(Rangin, C., *et al.*) 9: 552
— Troodos extrusive series of Cyprus; a comparison with oceanic crust
(Schmincke, Hans-Ulrich, *et al.*) 7: 405

Lesser Antilles—stratigraphy
Cretaceous: La Desirade Island (Lesser Antilles) revisited; Lower Cretaceous radiolarian cherts and arguments against an ophiolitic origin for the basal complex
(Bouysse, Philippe, *et al.*) 4: 244

Lesser Antilles—volcanology
Mount Pelee: Mount St. Helens 1980 and Mount Pelee 1902; flow or surge?
(Walker, George P. L., *et al.*) 10: 571

Libya—paleobotany
palynomorphs: Caradocian land plant microfossils from Libya; discussion and reply
(Strother, Paul K., *et al.*) 5: 316

Libya—tectonophysics
plate tectonics: Sirte Basin, north-central Libya; Cretaceous rifting above a fixed mantle hotspot?
(Van Houten, Franklyn B.) 2: 115

limnology *see under* hydrology

lineation *see also* foliation; structural analysis

liquid inclusions *see* fluid inclusions

magmas *see also* igneous rocks; intrusions; lava

magmas—composition
alkalic composition: Natrocarbonatite tephra of Kerimasi Volcano, Tanzania
(Hay, Richard L.) 10: 599

magmas—differentiation
fractional crystallization: Chemical differentiation of the Bishop Tuff and other high-silica magmas through crystallization processes
(Michael, Peter J.) 1: 31
— Chemical differentiation of the Bishop Tuff and other high-silica magmas through crystallization processes; discussion and reply
(Hildreth, Wes, *et al.*) 10: 622
— Distribution of differentiated tholeiitic basalts on the lower East Rift Zone of Kilauea Volcano, Hawaii; a possible guide to geothermal exploration
(Moore, Richard B.) 3: 136

magmas—evolution
geochemistry: Origin of K_2O-SiO_2 trends in volcanoes of the Mariana Arc
(Meijer, Arend, *et al.*) 2: 67
magma chambers: Composition of the Samail ocean crust
(Pallister, John S., *et al.*) 11: 638
— Nested calderas and trapdoor uplift at Pantelleria, Strait of Sicily
(Mahood, Gail, *et al.*) 12: 722

magmas—genesis
anatexis: Origin and age of Adirondack anorthosites re-evaluated with Nd isotopes
(Basu, Asish R., *et al.*) 9: 514
mantle: Incompatible-element-rich andesitic amphibolites from the Archean of Montana and Wyoming; evidence for mantle metasomatism
(Mueller, Paul A., *et al.*) 4: 203
mixing: Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt
(Nelson, Dennis O.) 4: 248
— Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt; discussion and reply
(Carlson, Richard W., *et al.*) 12: 735

magmas—geochemistry
sulfur: Igneous sulfides in the Fish Canyon Tuff and the role of sulfur in calc-alkaline magmas
(Whitney, James A., *et al.*) 2: 99

magnetic surveys *see under* geophysical surveys *under* Minnesota; Wisconsin

mantle—composition
carbon: Liquid carbon in the lower mantle?
(Dickey, John S., Jr., *et al.*) 4: 219

mantle—geochemistry
isotopes: Earth degassing, mantle metasomatism, and isotopic evolution of the mantle
(Vollmer, R.) 8: 452

Mariana Islands—petrology
lava: Origin of K_2O-SiO_2 trends in volcanoes of the Mariana Arc
(Meijer, Arend, *et al.*) 2: 67

marine geology—practice
current research: Marine geology and geophysics
(Silver, Eli A.) 12: 686

marine sediments *see under* sediments

Mars—geomorphology
fluvial features: Shapes of streamlined islands on Earth and Mars; experiments and analyses of the minimum-drag form
(Komar, Paul D.) 11: 651
processes: Drainage systems developed by sapping on Earth and Mars; discussions and reply
(Stiller, David, *et al.*) 1: 54

mass movements *see under* geomorphology

mathematical geology *see also* automatic data processing

mathematical geology—methods
regression analysis: Improper use of regression equations in earth sciences
(Williams, Garnett P.) 4: 195

Mediterranean region *see also* the individual countries

Mediterranean region—stratigraphy
archaeology: Archaeological geology in the eastern Mediterranean
(Herz, Norman, *et al.*) 1: 49

Mediterranean Sea *see also* Aegean Sea

Mediterranean Sea—petrology
volcanism: Nested calderas and trapdoor uplift at Pantelleria, Strait of Sicily
(Mahood, Gail, *et al.*) 12: 722

meetings *see* symposia

metal ores *see also under* economic geology *under* symposia

metal ores—genesis
ore-forming fluids: Origin of fluids and metals in porphyry and epithermal mineral deposits
(LeAnderson, Jim, *et al.*) 9: 557

metamorphic rocks *see also* igneous rocks; metamorphism; metasomatism

metamorphic rocks—amphibolites
orthoamphibolite: Incompatible-element-rich andesitic amphibolites from the Archean of Montana and Wyoming; evidence for mantle metasomatism
(Mueller, Paul A., *et al.*) 4: 203

metamorphic rocks—distribution
complexes: Application of Landsat multispectral scanner data and sediment spectral reflectance measurements to mapping of the Meatiq Dome, Egypt
(Jacobberger, P. A., *et al.*) 10: 587
— Archean crust as revealed in the Kapuskasing Uplift, Superior Province, Canada
(Percival, J. A., *et al.*) 6: 323
terranes: Tectonic accretion and the origin of the two major metamorphic and plutonic welts in the Canadian Cordillera; discussion and reply
(Brew, David A., *et al.*) 7: 427

metamorphic rocks—genesis
complexes: Shear-zone model for the origin of metamorphic core complexes
(Davis, George H.) 6: 342

metamorphic rocks—metasedimentary rocks
textures: Complex refolding history of the Pelona, Orocopia, and Rand schists, Southern California
(Jacobson, Carl E.) 10: 583

metamorphic rocks—metavolcanic rocks
genesis: Seven Devils terrane; is it really a piece of Wrangellia?
(Sarewitz, Daniel) 11: 634

metamorphic rocks—mylonites
elastic properties: Seismic velocity and anisotropy in mylonites and the reflectivity of deep crustal fault zones; discussion and reply
(Etheridge, M. A., *et al.*) 8: 487
pseudotachylite: Melt origin of fault-generated pseudotachylytes demonstrated by textures
(Maddock, R. H.) 2: 105
textures: Growth of a zoned plagioclase porphyroblast in a mylonite
(Wintsch, Robert P., *et al.*) 6: 360

metamorphic rocks—petrology
complexes: Geology and origin of Meatiq Dome, Egypt; a Precambrian metamorphic core complex?
(Sturchio, Neil C., *et al.*) 2: 72
— Shuswap Terrane of British Columbia; a Mesozoic "core complex"
(Brown, Richard L., *et al.*) 3: 164
current research: Metamorphic petrology
(Crawford, Maria Luisa B.) 12: 687

metamorphic rocks—schists
blueschist: Pre-Mesozoic lawsonite in Anglesey, northern Wales; preservation of ancient blueschists
(Gibbons, Wes, *et al.*) 1: 3

metamorphism *see also* metamorphic rocks; metasomatism

metamorphism—burial metamorphism
depth indicators: Fission-track analysis of apatite and zircon defines a burial depth of 4 to 7 km for lowermost Upper Devonian, Catskill Mountains, New York
(Lakatos, Stephen, *et al.*) 2: 103
— Time-temperature-burial significance of Devonian anthracite implies former great (≈6.5 km) depth of burial of Catskill Mountains, New York; discussion and reply
(Levine, Jeffrey R., *et al.*) 2: 122
evolution: Influence of time on metamorphism of sedimentary organic matter in liquid-dominated geothermal systems, western North America
(Barker, Charles E.) 7: 384

metamorphism—P-T conditions
shear zones: Pre-Mesozoic lawsonite in Anglesey, northern Wales; preservation of ancient blueschists
(Gibbons, Wes, *et al.*) 1: 3

metamorphism—polymetamorphism
evolution: Shuswap Terrane of British Columbia; a Mesozoic "core complex"
(Brown, Richard L., *et al.*) 3: 164

metamorphism—regional metamorphism
theoretical studies: Differential stress magnitudes during regional deformation and metamorphism; upper bound imposed by tensile fracturing
(Etheridge, M. A.) 4: 231

metamorphism—retrograde metamorphism
hydration: Water exsolution from quartz; implications for the generation of retrograde metamorphic fluids
(Spear, Frank S., *et al.*) 2: 82

metamorphism—zoning
mechanism: Alpine model for the internal metamorphic zones of the North American Cordillera
(Mattauer, Maurice, *et al.*) 1: 11

metasomatic rocks *see also* igneous rocks; metamorphic rocks; metamorphism; metasomatism

metasomatism *see also* metamorphism

metasomatism—environment
mantle: Earth degassing, mantle metasomatism, and isotopic evolution of the mantle
(Vollmer, R.) 8: 452

meteor craters *see also under* geomorphology *under* Canadian Shield; Ontario

methods *see under* absolute age; mathematical geology

Mexico *see also* Gulf Coastal Plain

Mexico—stratigraphy
Cambrian: Precambrian-Cambrian transition problem in western North America; Part II, Early Cambrian skeletonized fauna and associated fossils from Sonora, Mexico
(McMenamin, Mark A. S., *et al.*) 4: 227

Mexico—structural geology
neotectonics: Tectonic preservation of the divide between the Salton Basin and the Gulf of California
(Gilmore, Thomas D., *et al.*) 8: 474

Mexico—tectonophysics
plate tectonics: Geodynamic significance of Late Triassic to Early Cretaceous volcanic sequences of Vizcaino Peninsula and Cedros Island, Baja California, Mexico
(Rangin, C., *et al.*) 9: 552

Michigan—stratigraphy
Devonian: Foerstia from the Antrim Shale (Devonian) of Michigan
(Matthews, R. David) 6: 327

Micronesia *see also* Mariana Islands

Middle East *see also* Cyprus

Midwest *see also* Kansas; Michigan; Minnesota; Nebraska; South Dakota; Wisconsin

Midwest—tectonophysics
crust: Proterozoic structural provinces in the north-central United States
(Dutch, Steven I.) 8: 478

mineral deposits, genesis—causes
current research: Mineral deposits
(Skinner, Brian J.) 12: 685

mineral deposits, genesis—concepts
ore-forming fluids: Origin of fluids and metals in porphyry and epithermal mineral deposits
(LeAnderson, Jim, *et al.*) 9: 557

mineral deposits, genesis—controls
structural controls: Devonian-Mississippian sinistral transcurrent faulting along the cratonic margin of western North America; a hypothesis
(Eisbacher, G. H.) 1: 7

mineral deposits, genesis—environment
sedimentary basins: Hydrodynamics and geochemistry of ore generation in sedimentary environments
(Kelly, William C., *et al.*) 5: 309

mineral deposits, genesis—polymetallic ores
structural controls: Genesis of the sandstone (Revett) type of copper-silver occurrences in the Belt Supergroup of northwestern Montana and northeastern Idaho
(Lange, Ian M., *et al.*) 11: 643

mineral deposits, genesis—processes
hydrothermal processes: Active hydrothermal vents and sulfide deposits on the southern Juan de Fuca Ridge
(Normark, William R., *et al.*) 3: 158

mineral inclusions *see under* inclusions

mineral resources *see also* the individual deposits

minerals *see also* crystal growth

minerals—carbonates
calcite: Origin of calcite in syntectonic veins as determined from carbon-isotope ratios
(Dietrich, Dorothee, *et al.*) 9: 547
crystal growth: Mineralogical and paramorphic textural changes generated in modern ooids by heat and compaction
(Bhattacharyya, Ajit, *et al.*) 10: 596
nyerereite: Natrocarbonatite tephra of Kerimasi Volcano, Tanzania
(Hay, Richard L.) 10: 599

minerals—framework silicates
crystal growth: Simultaneous crystallization of quartz-feldspar intergrowths from granitic magmas
(Carstens, Harald) 6: 339

minerals—framework silicates, plagioclase
crystal growth: Growth of a zoned plagioclase porphyroblast in a mylonite
(Wintsch, Robert P., *et al.*) 6: 360

minerals—framework silicates, silica minerals
quartz: Water exsolution from quartz; implications for the generation of retrograde metamorphic fluids
(Spear, Frank S., *et al.*) 2: 82

minerals—sorosilicates
lawsonite: Pre-Mesozoic lawsonite in Anglesey, northern Wales; preservation of ancient blueschists
(Gibbons, Wes, *et al.*) 1: 3

minerals—sulfides
zinc sulfides: Active hydrothermal vents and sulfide deposits on the southern Juan de Fuca Ridge
(Normark, William R., *et al.*) 3: 158

Minnesota—geochronology
Pleistocene: Late Quaternary U-series speleothem growth record from southeastern Minnesota
(Lively, R. S.) 5: 259

Minnesota—geophysical surveys
magnetic surveys: Correlation of magnetic anomalies in east-central Minnesota and northwestern Wisconsin; constraints on magnitude and direction of Keweenawan rifting
(Chandler, Val W.) 3: 174

Miocene *see also under* stratigraphy *under* Antarctica; Pacific Ocean

Mohorovicic discontinuity *see also* mantle

Mollusca—Cephalopoda
Cambrian: Cambrian cephalopods
(Chen Jun-yuan, *et al.*) 11: 647

mollusks—biochemistry
amino acids: Intrashell variations in amino acid concentrations and isoleucine epimerization ratios in fossil Hiatella arctica
(Brigham, Julie K.) 9: 509

mollusks—biostratigraphy
Cambrian: Precambrian-Cambrian transition problem in western North America; Part I, Tommotian fauna in the southwestern Great Basin and its implications for the base of the Cambrian System
(Mount, Jeffrey F., *et al.*) 4: 224

mollusks—bivalves
Holocene: Seasonal temperature-salinity changes and thermocline development in the Mid-Atlantic Bight as recorded by the isotopic composition of bivalves
(Arthur, Michael A., *et al.*) 11: 655

mollusks—cephalopods
Cambrian: Cambrian cephalopods
(Chen Jun-yuan, *et al.*) 11: 647

mollusks—gastropods
Holocene: Limestone and the problem of radiocarbon dating of land-snail shell carbonate
(Goodfriend, Glenn A., *et al.*) 10: 575

Montana—economic geology
copper ores: Genesis of the sandstone (Revett) type of copper-silver occurrences in the Belt Supergroup of northwestern Montana and northeastern Idaho
(Lange, Ian M., *et al.*) 11: 643

Montana—petrology
metamorphic rocks: Incompatible-element-rich andesitic amphibolites from the Archean of Montana and Wyoming; evidence for mantle metasomatism
(Mueller, Paul A., *et al.*) 4: 203

mud volcanoes *see also* volcanology

nappes *see under* orientation *under* folds

Nebraska—seismology
earthquakes: Seismicity of the Colorado Lineament; discussions and reply
(Wong, Ivan G., *et al.*) 9: 558

neodymium—isotopes
Nd-144/Nd-143: Nd-Sr isotopic study of primitive lavas from the Troodos ophiolite, Cyprus; evidence for a subduction-related setting
(McCulloch, M. T., *et al.*) 12: 727
— Origin and age of Adirondack anorthosites re-evaluated with Nd isotopes
(Basu, Asish R., *et al.*) 9: 514

Neogene—sedimentary petrology
sedimentation: Worldwide continental denudation and climatic deterioration during the late Tertiary; evidence from deep-sea sediments; discussion
(Belderson, R. H., *et al.*) 6: 366

neotectonics *see also under* structural geology *under* Arizona; Basin and Range Province; California; Colorado Plateau; Mexico; New Zealand

Nevada—stratigraphy
Cambrian: Precambrian-Cambrian transition problem in western North America; Part I, Tommotian fauna in the southwestern Great Basin and its implications for the base of the Cambrian System
(Mount, Jeffrey F., *et al.*) 4: 224
Devonian: Mid-Paleozoic age of the Roberts thrust unsettled by new data from northern Nevada; discussion and reply
(Drowley, David, *et al.*) 10: 617
Paleozoic: Mid-Paleozoic age of the Roberts thrust unsettled by new data from northern Nevada; discussion and reply
(Johnson, J. G., *et al.*) 1: 60

Nevada—structural geology
orogeny: Sonoma Orogeny and Permian to Triassic tectonism in western North America
(Gabrielse, Hubert, *et al.*) 8: 484
tectonics: Magnitude of crustal extension in the southern Great Basin; discussion and reply
(Royse, Frank, *et al.*) 8: 495
— Mid-Paleozoic age of the Roberts thrust unsettled by new data from northern Nevada; discussion and reply
(Drowley, David, *et al.*) 10: 617
— Tectonic implications of a late Mesozoic fold and thrust belt in northwestern Nevada
(Oldow, John S.) 9: 542

New Jersey—oceanography
continental shelf: Seasonal temperature-salinity changes and thermocline development in the Mid-Atlantic Bight as recorded by the isotopic composition of bivalves
(Arthur, Michael A., *et al.*) 11: 655
continental slope: Furrowed outcrops of Eocene chalk on the lower continental slope offshore New Jersey
(Robb, James M., *et al.*) 3: 182

New Mexico—structural geology
tectonics: Tectonic implications of mid-Tertiary dikes in west-central New Mexico
(Laughlin, A. W., *et al.*) 1: 45

New York—geochemistry
trace elements: Origin and age of Adirondack anorthosites re-evaluated with Nd isotopes
(Basu, Asish R., *et al.*) 9: 514

New York—geochronology
Devonian: Fission-track analysis of apatite and zircon defines a burial depth of 4 to 7 km for lowermost Upper Devonian, Catskill Mountains, New York
(Lakatos, Stephen, *et al.*) 2: 103
Proterozoic: Origin and age of Adirondack anorthosites re-evaluated with Nd isotopes
(Basu, Asish R., *et al.*) 9: 514

New York—petrology
metamorphism: Time-temperature-burial significance of Devonian anthracite implies former great (≈6.5 km) depth of burial of Catskill Mountains, New York; discussion and reply
(Levine, Jeffrey R., *et al.*) 2: 122

New York—structural geology
tectonics: Uplift rate of Adirondack anorthosite measured by fission-track analysis of apatite
(Miller, Donald S., *et al.*) 5: 284

New Zealand—engineering geology
slope stability: Frequency and hazard of large rock avalanches in the central Southern Alps, New Zealand
(Whitehouse, Ian E., *et al.*) 6: 331

New Zealand—environmental geology
geologic hazards: Frequency and hazard of large rock avalanches in the central Southern Alps, New Zealand
(Whitehouse, Ian E., *et al.*) 6: 331

New Zealand—geochronology
Quaternary: Upper Quaternary marine terrace chronology and deformation, South Taranaki, New Zealand
(Pillans, Brad) 5: 292

New Zealand—geomorphology
changes of level: Upper Quaternary marine terrace chronology and deformation, South Taranaki, New Zealand
(Pillans, Brad) 5: 292

New Zealand—geophysical surveys
seismic surveys: Crustal structure of Fiordland, southwestern New Zealand, from seismic-refraction measurements
(Priestley, Keith, *et al.*) 11: 660

New Zealand—seismology
crust: Crustal structure of Fiordland, southwestern New Zealand, from seismic-refraction measurements
(Priestley, Keith, *et al.*) 11: 660

New Zealand—structural geology
neotectonics: Upper Quaternary marine terrace chronology and deformation, South Taranaki, New Zealand
(Pillans, Brad) 5: 292

Newfoundland—structural geology
tectonics: Reinterpretation of Newfoundland gravity data and arguments for an allochthonous Dunnage Zone
(Karlstrom, K. E.) 5: 263

Newfoundland—tectonophysics
crust: Reinterpretation of Newfoundland gravity data and arguments for an allochthonous Dunnage Zone
(Karlstrom, K. E.) 5: 263

Nicaragua—petrology
volcanism: Plinian airfall deposits of basaltic composition
(Williams, Stanley N.) 4: 211
— Plinian airfall deposits of basaltic composition; discussion and reply
(Bice, David C., *et al.*) 10: 616

noble gases *see also* helium

North America *see also* Appalachians; Atlantic Coastal Plain; Canada; Great Lakes region; Great Plains; Gulf Coastal Plain; Mexico; Rocky Mountains; United States

North America—geochemistry
surface water: Relationship of two lacustrine ostracode species to solute composition and salinity; implications for paleohydrochemistry
(Forester, Richard M.) 8: 435

North America—geochronology
Phanerozoic: The Decade of North American Geology 1983 geologic time scale
(Palmer, Allison R.) 9: 503
Precambrian: The Decade of North American Geology 1983 geologic time scale
(Palmer, Allison R.) 9: 503

North America—stratigraphy
Proterozoic: Precambrian-Cambrian transition problem in western North America; Part I, Tommotian fauna in the southwestern Great Basin and its implications for the base of the Cambrian System
(Mount, Jeffrey F., *et al.*) 4: 224
— Precambrian-Cambrian transition problem in western North America; Part II, Early Cambrian skeletonized fauna and associated fossils from Sonora, Mexico
(McMenamin, Mark A. S., *et al.*) 4: 227
Triassic: Seven Devils terrane; is it really a piece of Wrangellia?
(Sarewitz, Daniel) 11: 634

North America—structural geology
tectonics: Comparison of terrane accretion in modern Southeast Asia and the Mesozoic North American Cordillera
(Silver, Eli A., *et al.*) 4: 198
— Devonian-Mississippian sinistral transcurrent faulting along the cratonic margin of western North America; a hypothesis
(Eisbacher, G. H.) 1: 7
— Sonoma Orogeny and Permian to Triassic tectonism in western North America
(Gabrielse, Hubert, *et al.*) 8: 484

North America—tectonophysics
crust: Correlation of magnetic anomalies in east-central Minnesota and northwestern Wisconsin; constraints on magnitude and direction of Keweenawan rifting
(Chandler, Val W.) 3: 174
plate tectonics: Alpine model for the internal metamorphic zones of the North American Cordillera
(Mattauer, Maurice, *et al.*) 1: 11
— Amazon Rift and Pisco-Jurua Fault; their relation to the separation of North America from Gondwana
(Szatmari, Peter) 5: 300

North Carolina—petrology
intrusions: Juxtaposed Mesozoic diabase dike sets from the Carolinas; a preliminary assessment
(Ragland, Paul C., *et al.*) 7: 394

Northern Hemisphere *see also* Arctic Ocean; Asia; Atlantic Ocean; North America; Pacific Ocean

Northwest Territories—sedimentary petrology
sedimentary rocks: Evidence for primary aragonite precipitation, lower Proterozoic (1.9-Ga) Rocknest Dolomite, Wopmay Orogen, Northwest Canada
(Grotzinger, J. P., *et al.*) 12: 710

ocean floors *see also under* oceanography *under* Atlantic Ocean; Barbados; Pacific Ocean

Oklahoma—geophysical surveys
seismic surveys: COCORP profiling across the Southern Oklahoma Aulacogen; overthrusting of the Wichita Mountains and compression within the Anadarko Basin
(Brewer, J. A., *et al.*) 2: 109

Oklahoma—seismology
crust: COCORP profiling across the Southern Oklahoma Aulacogen; overthrusting of the Wichita Mountains and compression within the Anadarko Basin
(Brewer, J. A., *et al.*) 2: 109

Oklahoma—structural geology
tectonics: COCORP profiling across the Southern Oklahoma Aulacogen; overthrusting of the Wichita Mountains and compression within the Anadarko Basin
(Brewer, J. A., *et al.*) 2: 109
— Tectonic history of the Ouachita Orogen
(Thomas, William A., *et al.*) 8: 482

Oligocene *see also under* stratigraphy *under* Antarctic Ocean

Oligocene—geochronology
time scales: Oligocene calibration of the magnetic polarity time scale; discussion and reply
(Ness, Gordon E., *et al.*) 7: 429

Oman—tectonophysics
crust: Composition of the Samail ocean crust
(Pallister, John S., *et al.*) 11: 638

Ontario—geomorphology
meteor craters: Concentrically zoned pattern in the Bouguer gravity anomaly map of northeastern North America; discussion and reply
(Briggs, Reginald P., *et al.*) 5: 318

Ontario—stratigraphy
Pleistocene: Sedimentation in a large lake; a reinterpretation of the late Pleistocene stratigraphy at Scarborough Bluffs, Ontario, Canada
(Eyles, Carolyn H., *et al.*) 3: 146

ooze *see under* clastic sediments *under* sediments

ophiolite *see under* ultramafics *under* igneous rocks

Ordovician *see also under* stratigraphy *under* California

Oregon—geochemistry
trace elements: Seven Devils terrane; is it really a piece of Wrangellia?
(Sarewitz, Daniel) 11: 634

Oregon—tectonophysics
plate tectonics: Sedimentary record of subduction to forearc transition in the rotated Eocene basin of western Oregon
(Heller, Paul L., *et al.*) 7: 380

organic materials—abundance
marine sediments: Increased productivity in the eastern equatorial Pacific during the last glacial maximum (19,000 to 14,000 yr B.P.)
(Pedersen, Thomas F.) 1: 16

organic materials—alteration
thermal alteration: Influence of time on metamorphism of sedimentary organic matter in liquid-dominated geothermal systems, western North America
(Barker, Charles E.) 7: 384

organic materials—amino acids
racemization: Intrashell variations in amino acid concentrations and isoleucine epimerization ratios in fossil Hiatella arctica
(Brigham, Julie K.) 9: 509

organic materials—genesis
processes: Evolutionary and geologic consequences of organic carbon fixing in the primitive anoxic ocean
(Berry, W. B. N., *et al.*) 3: 141

organic materials—hydrocarbons
genesis: Role of bacterial mats in oxygen-deficient marine basins and coastal upwelling regimes; preliminary report
(Williams, Loretta Ann, *et al.*) 5: 267

orogeny *see also* geosynclines

orogeny—absolute age
Laramide Orogeny: Tectonic implications of mid-Tertiary dikes in west-central New Mexico
(Laughlin, A. W., *et al.*) 1: 45

orogeny—evolution
Allegheny Orogeny: Some consequences of palinspastic reconstruction in the Southern Appalachians
(Cook, Frederick A.) 2: 86
Appalachian Phase: Crustal structure beneath the Southern Appalachians; nonuniqueness of gravity modeling
(Hutchinson, Deborah R., *et al.*) 10: 611
Ellesmerian Orogeny: Evolution of the early Paleozoic deep-water basin of North Greenland; aulacogen or narrow ocean?
(Surlyk, Finn, *et al.*) 2: 77

Oman Orogeny: Fluid inclusion petrography and tectonic-burial history of the Al Ali No. 2 well; evidence for the timing of diagenesis and oil migration, northern Oman Foredeep
(Burruss, R. C., *et al.*) 10: 567
orogenic belts: Continental margins, orogenic belts, and intracratonic structures
(Thomas, William A.) 5: 270
Ouachita Orogeny: Tectonic history of the Ouachita Orogen
(Thomas, William A., *et al.*) 8: 482
Sonoma Orogeny: Sonoma Orogeny and Permian to Triassic tectonism in western North America
(Gabrielse, Hubert, *et al.*) 8: 484
Taconic Orogeny: Analogous tectonic evolution of the Ordovician foredeeps, Southern and Central Appalachians; discussion and reply
(Hiscott, R. N., *et al.*) 12: 732

orogeny—mechanism
stress: Devonian-Mississippian sinistral transcurrent faulting along the cratonic margin of western North America; a hypothesis
(Eisbacher, G. H.) 1: 7

Ostracoda—Cytherocopina
Holocene: Relationship of two lacustrine ostracode species to solute composition and salinity; implications for paleohydrochemistry
(Forester, Richard M.) 8: 435

ostracods *see also* Ostracoda

oxygen—isotopes
O-18/O-16: Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt
(Nelson, Dennis O.) 4: 248
— Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt; discussion and reply
(Carlson, Richard W., *et al.*) 12: 735
— Isotope-plankton comparisons in a late Quaternary core with a stable temperature history
(Crowley, T. J., *et al.*) 5: 275
— Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335
— Quaternary aragonite cycles and oxygen-isotope record in Bahamian carbonate ooze
(Droxler, A. W., *et al.*) 4: 235
— Seasonal temperature-salinity changes and thermocline development in the Mid-Atlantic Bight as recorded by the isotopic composition of bivalves
(Arthur, Michael A., *et al.*) 11: 655

P-T conditions *see under* metamorphism

Pacific Coast *see also* the individual states and provinces

Pacific Ocean—geophysical surveys
acoustical surveys: Laccoliths(?) and small volcanoes on the flank of the East Pacific Rise
(Lonsdale, Peter) 12: 706
— Multiple, closely spaced transform faults in fast-slipping fracture zones
(Searle, R. C.) 10: 607

Pacific Ocean—oceanography
ocean floors: Laccoliths(?) and small volcanoes on the flank of the East Pacific Rise
(Lonsdale, Peter) 12: 706
reefs: Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335

Pacific Ocean—sedimentary petrology
sediments: Spheroids at the Cretaceous-Tertiary boundary are altered impact droplets of basaltic composition
(Montanari, Alessandro, *et al.*) 11: 668

Pacific Ocean—stratigraphy
changes of level: Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335
Miocene: Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335
Pleistocene: Increased productivity in the eastern equatorial Pacific during the last glacial maximum (19,000 to 14,000 yr B.P.)
(Pedersen, Thomas F.) 1: 16

Pacific Ocean—tectonophysics
plate tectonics: Corals from a dismembered late Paleozoic paleo-Pacific plateau
(Stevens, Calvin H.) 10: 603
— Model for the origin of the Yakutat Block, an accreting terrane in the northern Gulf of Alaska
(Bruns, Terry R.) 12: 718
— Tectonic uplift of a middle Wisconsin marine platform near the Mendocino triple junction, California
(McLaughlin, R. J., *et al.*) 1: 35
sea-floor spreading: Active hydrothermal vents and sulfide deposits on the southern Juan de Fuca Ridge
(Normark, William R., *et al.*) 3: 158
— Multiple, closely spaced transform faults in fast-slipping fracture zones
(Searle, R. C.) 10: 607
— Time and space constraints on the evolution of medium-rate spreading centers
(Lichtman, Grant S., *et al.*) 10: 592

Pacific region *see also* the individual countries

Pacific region—stratigraphy
Paleozoic: Corals from a dismembered late Paleozoic paleo-Pacific plateau
(Stevens, Calvin H.) 10: 603

Pacific region—tectonophysics
plate tectonics: Comparison of terrane accretion in modern Southeast Asia and the Mesozoic North American Cordillera
(Silver, Eli A., *et al.*) 4: 198

Paleocene—stratigraphy
boundary: Spheroids at the Cretaceous-Tertiary boundary are altered impact droplets of basaltic composition
(Montanari, Alessandro, *et al.*) 11: 668

paleoclimatology—Cenozoic
Arctic Ocean: Baffin Bay; present-day analog of the central Arctic during late Pliocene to mid-Pleistocene time
(Herman, Yvonne) 6: 356

paleoclimatology—Holocene
global: Radiocarbon-dated evidence of worldwide early Holocene climate change
(Beget, James E.) 7: 389

paleoclimatology—Neogene
global: Worldwide continental denudation and climatic deterioration during the late Tertiary; evidence from deep-sea sediments; discussion
(Belderson, R. H., *et al.*) 6: 366

paleoclimatology—Pleistocene
Minnesota: Late Quaternary U-series speleothem growth record from southeastern Minnesota
(Lively, R. S.) 5: 259
Pacific Ocean: Increased productivity in the eastern equatorial Pacific during the last glacial maximum (19,000 to 14,000 yr B.P.)
(Pedersen, Thomas F.) 1: 16

paleoclimatology—Quaternary
Atlantic Ocean: Isotope-plankton comparisons in a late Quaternary core with a stable temperature history
(Crowley, T. J., *et al.*) 5: 275
Bahamas: Quaternary aragonite cycles and oxygen-isotope record in Bahamian carbonate ooze
(Droxler, A. W., *et al.*) 4: 235

paleoclimatology—Tertiary
Antarctic Ocean: Late Oligocene-early Miocene glacial record of the Ross Sea, Antarctica; evidence from DSDP Site 270
(Leckie, R. Mark, *et al.*) 10: 578

paleoecology—Archean
global: Evolutionary and geologic consequences of organic carbon fixing in the primitive anoxic ocean
(Berry, W. B. N., *et al.*) 3: 141

paleoecology—corals
Paleozoic: Corals from a dismembered late Paleozoic paleo-Pacific plateau
(Stevens, Calvin H.) 10: 603

paleoecology—foraminifers
Pliocene: Baffin Bay; present-day analog of the central Arctic during late Pliocene to mid-Pleistocene time
(Herman, Yvonne) 6: 356
Tertiary: Late Oligocene-early Miocene glacial record of the Ross Sea, Antarctica; evidence from DSDP Site 270
(Leckie, R. Mark, *et al.*) 10: 578

paleoecology—indicators
stable isotopes: Seasonal temperature-salinity changes and thermocline development in the Mid-Atlantic Bight as recorded by the isotopic composition of bivalves
(Arthur, Michael A., *et al.*) 11: 655

paleoecology—mollusks
Cambrian: Cambrian cephalopods
(Chen Jun-yuan, *et al.*) 11: 647

paleoecology—Ostracoda
lacustrine environment: Relationship of two lacustrine ostracode species to solute composition and salinity; implications for paleohydrochemistry
(Forester, Richard M.) 8: 435

paleoecology—Pleistocene
Pacific Ocean: Increased productivity in the eastern equatorial Pacific during the last glacial maximum (19,000 to 14,000 yr B.P.)
(Pedersen, Thomas F.) 1: 16

paleogeography—Cretaceous
Utah: Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah
(Ryer, Thomas A.) 4: 207
— Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah; discussion and reply
(Fassett, James E., *et al.*) 12: 736

paleogeography—Mesozoic
Mexico: Geodynamic significance of Late Triassic to Early Cretaceous volcanic sequences of Vizcaino Peninsula and Cedros Island, Baja California, Mexico
(Rangin, C., *et al.*) 9: 552

paleogeography—Paleozoic
Greenland: Evolution of the early Paleozoic deep-water basin of North Greenland; aulacogen or narrow ocean?
(Surlyk, Finn, *et al.*) 2: 77
Pacific region: Corals from a dismembered late Paleozoic paleo-Pacific plateau
(Stevens, Calvin H.) 10: 603

paleomagnetism *see under* continental drift; geochronology

paleomagnetism—Cenozoic
California: Rates of late Cenozoic tectonism in the Vallecito-Fish Creek basin, western Imperial Valley, California
(Johnson, Noye M., *et al.*) 11: 664

paleomagnetism—Cretaceous
California: Marine magnetic anomaly 33-34 identified in the Upper Cretaceous of the Great Valley Sequence of California
(Ward, Peter D., *et al.*) 2: 90

paleomagnetism—interpretation
magnetic anomalies: Along-strike amplitude variations of oceanic magnetic stripes; are they related to low-temperature hydrothermal circulation?; discussion and reply
(Amsbury, David L., *et al.*) 2: 125

paleomagnetism—Oligocene
global: Oligocene calibration of the magnetic polarity time scale; discussion and reply
(Ness, Gordon E., *et al.*) 7: 429

paleomagnetism—Paleozoic
United States: Diagenetic magnetite carries ancient yet secondary remanence in some Paleozoic sedimentary carbonates
(McCabe, Chad, *et al.*) 4: 221

paleomagnetism—Phanerozoic
California: Paleomagnetic data from the Redding section of the eastern Klamath belt, Northern California
(Fagin, Stuart W., *et al.*) 9: 505

paleomagnetism—Pleistocene
Arctic Ocean: Short-period geomagnetic excursion recorded in Pleistocene sediments of Baffin Bay and Davis Strait
(Aksu, A. E.) 9: 537

paleomagnetism—polar wandering
continental drift: Drifting along with a wandering polar curve
(Beaty, Chester B.) 11: 672

paleontology—biologic evolution
photosynthesis: Evolutionary and geologic consequences of organic carbon fixing in the primitive anoxic ocean
(Berry, W. B. N., *et al.*) 3: 141

paleontology—concepts
extinction: Itching eyes and dinosaur demise
(Dott, R. H., Jr.) 2: 126

paleontology—practice
current research: Paleontology
(Signor, Philip W., III, *et al.*) 12: 684

Paleozoic *see also under* stratigraphy *under* British Columbia; Nevada; Pacific region; United States

paleozoogeography *see* biogeography

palynomorphs—taxonomy
Ordovician: Caradocian land plant microfossils from Libya; discussion and reply
(Strother, Paul K., *et al.*) 5: 316

Pennsylvania—structural geology
tectonics: Tectonic model for kimberlite emplacement in the Appalachian Plateau of Pennsylvania; discussion and reply
(Dennison, John M., *et al.*) 4: 252

petroleum *see also under* economic geology *under* United Arab Emirates

petroleum—genesis
source rocks: Role of bacterial mats in oxygen-deficient marine basins and coastal upwelling regimes; preliminary report
(Williams, Loretta Ann, *et al.*) 5: 267

petrology—practice
current research: Igneous rocks
(McBirney, Alexander R.) 12: 688
— Metamorphic petrology
(Crawford, Maria Luisa B.) 12: 687

Phanerozoic *see also* Neogene; Paleocene; Tertiary; *see also under* geochronology *under* North America; *see also under* stratigraphy *under* California

phase equilibria—magmas
interpretation: Composition of the Samail ocean crust
(Pallister, John S., *et al.*) 11: 638

physical geography *see* geomorphology

planetology *see also* Mars

planetology—concepts
exploration: Planetary geology
(Lucchitta, Baerbel K.) 12: 682

Plantae *see also* algal flora; bacteria; ichnofossils; palynomorphs; problematic fossils

Plantae—biostratigraphy
Paleogene: Radiometric dating of ash partings in coal of the Eocene Puget Group, Washington; implications for paleobotanical stages
(Turner, Donald L., *et al.*) 9: 527

plate tectonics *see also under* tectonophysics *under* Alaska; Antarctica; Archean; Arizona; Asia; British Columbia; California; Canadian Shield; Caribbean region; Gulf of Mexico; Libya; Mexico; North America; Oregon; Pacific Ocean; Pacific region; Rocky Mountains; symposia; Texas; Western Hemisphere; Western U.S.

plate tectonics—age
Archean: Model for Archean plate tectonics
(Nisbet, E. G., *et al.*) 7: 376
— Role of a thin, komatiite-rich oceanic crust in the Archean plate-tectonic process
(Arndt, Nicholas T.) 7: 372
plate tectonics—concepts
geodynamics: Marine geology and geophysics
(Silver, Eli A.) 12: 686
plate tectonics—mechanism
hot spots: Liquid carbon in the lower mantle?
(Dickey, John S., Jr., *et al.*) 4: 219
plate tectonics—movement
plate convergence: Plate motion in convergent plate boundaries
(Uyeda, Seiya) 12: 681
reconstruction: Some geometrical aspects of uncertainties in combined plate reconstructions
(Stock, Joann M., *et al.*) 12: 697
plate tectonics—plate geometry
continental margin: Continental margins, orogenic belts, and intracratonic structures
(Thomas, William A.) 5: 270
Pleistocene *see also under* geochronology *under* Arctic Ocean; California; Minnesota; *see also under* stratigraphy *under* Arctic Ocean; Great Lakes region; Ontario; Pacific Ocean
Pliocene *see also under* stratigraphy *under* Arctic Ocean
pollution *see also* waste disposal
potassium—geochemistry
lava: Origin of K_2O-SiO_2 trends in volcanoes of the Mariana Arc
(Meijer, Arend, *et al.*) 2: 67
Precambrian *see also* Archean; *see also under* geochronology *under* North America
Precambrian—tectonophysics
crust: Ancient crustal rocks, Brazilian style
(Van Schmus, Randy) 1: 53
problematic fossils—biostratigraphy
Cambrian: Precambrian-Cambrian transition problem in western North America; Part II, Early Cambrian skeletonized fauna and associated fossils from Sonora, Mexico
(McMenamin, Mark A. S., *et al.*) 4: 227
problematic fossils—occurrence
Precambrian: Are these the oldest metazoan trace fossils?; discussion and reply
(Cloud, Preston, *et al.*) 10: 618
Proterozoic *see also under* geochronology *under* Egypt; New York; *see also under* stratigraphy *under* Arizona; North America; Scotland; Texas; United States
Pyrenees *see also* Spain
pyroclastics *see under* igneous rocks
quartz *see under* framework silicates, silica minerals *under* minerals
Quaternary *see also under* geochronology *under* New Zealand; *see also under* stratigraphy *under* Atlantic Ocean; Bahamas
racemization *see under* geochronology
radioactive dating *see* absolute age
radiocarbon dating *see* absolute age
radiolarians—biostratigraphy
Cretaceous: La Desirade Island (Lesser Antilles) revisited; Lower Cretaceous radiolarian cherts and arguments against an ophiolitic origin for the basal complex
(Bouysse, Philippe, *et al.*) 4: 244
rare earths *see also* neodymium
rare earths—geochemistry
diabase: Geochemistry and tectonic affinities of a Proterozoic bimodal igneous suite, West Texas
(Rudnick, Roberta L.) 6: 352
magmas: Incompatible-element-rich andesitic amphibolites from the Archean of Montana and Wyoming; evidence for mantle metasomatism
(Mueller, Paul A., *et al.*) 4: 203
metavolcanic rocks: Seven Devils terrane; is it really a piece of Wrangellia?
(Sarewitz, Daniel) 11: 634
volcanic rocks: Nd-Sr isotopic study of primitive lavas from the Troodos ophiolite, Cyprus; evidence for a subduction-related setting
(McCulloch, M. T., *et al.*) 12: 727
reefs *see also under* oceanography *under* Pacific Ocean
regional geology *see* areal geology under the appropriate area term
remote sensing *see also* geophysical methods; *see also under* geophysical surveys *under* Egypt
reptiles *see also* Reptilia
Reptilia—dinosaurs
Cretaceous: Itching eyes and dinosaur demise
(Dott, R. H., Jr.) 2: 126
reservoir rocks *see under* materials *under* diagenesis
rock mechanics—materials, properties
elastic properties: Seismic velocity and anisotropy in mylonites and the reflectivity of deep crustal fault zones; discussion and reply
(Etheridge, M. A., *et al.*) 8: 487
Rocky Mountains *see also* the individual states and provinces
Rocky Mountains—geochemistry
trace elements: Incompatible-element-rich andesitic amphibolites from the Archean of Montana and Wyoming; evidence for mantle metasomatism
(Mueller, Paul A., *et al.*) 4: 203
Rocky Mountains—seismology
crust: Depth migration and interpretation of the COCORP Wind River, Wyoming, seismic reflection data
(Lynn, Heloise Bloxsom, *et al.*) 8: 462
Rocky Mountains—structural geology
tectonics: Alpine model for the internal metamorphic zones of the North American Cordillera
(Mattauer, Maurice, *et al.*) 1: 11
Rocky Mountains—tectonophysics
plate tectonics: Plate tectonics of the ancestral Rocky Mountains; discussion and reply
(Warner, L. A., *et al.*) 2: 120
Sahara *see also* the individual countries
salt tectonics *see also under* structural geology *under* Gulf Coastal Plain; Texas; Utah
schistosity *see under* style *under* foliation
Scotland—petrology
metamorphic rocks: Growth of a zoned plagioclase porphyroblast in a mylonite
(Wintsch, Robert P., *et al.*) 6: 360
— Melt origin of fault-generated pseudotachylytes demonstrated by textures
(Maddock, R. H.) 2: 105
Scotland—stratigraphy
Proterozoic: Glaciomarine model for upper Precambrian diamictites of the Port Askaig Formation, Scotland
(Eyles, Carolyn H., *et al.*) 12: 692
Scotland—structural geology
faults: Scale and timing of movements on the Great Glen Fault, Scotland
(Smith, D. I., *et al.*) 9: 523
sea-floor spreading *see also* continental drift; *see also under* tectonophysics *under* Caribbean Sea; Pacific Ocean
sea-floor spreading—concepts
magnetic anomalies: Along-strike amplitude variations of oceanic magnetic stripes; are they related to low-temperature hydrothermal circulation?; discussion and reply
(Amsbury, David L., *et al.*) 2: 125
sedimentary petrology—practice
sedimentology: Sedimentology
(Dott, R. H., Jr.) 12: 687
sedimentary petrology—symposia
diagenesis: Models of diagenesis in clastic reservoirs
(Wood, J., *et al.*) 3: 187
sedimentary rocks *see also* sedimentary structures; sedimentation; sediments

sedimentary rocks—carbonate rocks
diagenesis: Fluid inclusion petrography and tectonic-burial history of the Al Ali No. 2 well; evidence for the timing of diagenesis and oil migration, northern Oman Foredeep
(Burruss, R. C., *et al.*) 10: 567
— Mineralogical and paramorphic textural changes generated in modern ooids by heat and compaction
(Bhattacharyya, Ajit, *et al.*) 10: 596
dolostone: Burial dolomitization in the Lost Burro Formation (Devonian), east-central California, and the significance of late diagenetic dolomitization
(Zenger, Donald H.) 9: 519
— Evidence for primary aragonite precipitation, lower Proterozoic (1.9-Ga) Rocknest Dolomite, Wopmay Orogen, Northwest Canada
(Grotzinger, J. P., *et al.*) 12: 710
geochemistry: Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335
sedimentary rocks—clastic rocks
conglomerate: Tectonic models for Early Cretaceous rifting in southeastern Arizona; discussion and reply
(Drewes, Harald, *et al.*) 6: 364
diagenesis: Models of diagenesis in clastic reservoirs
(Wood, J., *et al.*) 3: 187
diamictite: Glaciomarine model for upper Precambrian diamictites of the Port Askaig Formation, Scotland
(Eyles, Carolyn H., *et al.*) 12: 692
flysch: Analogous tectonic evolution of the Ordovician foredeeps, Southern and Central Appalachians; discussion and reply
(Hiscott, R. N., *et al.*) 12: 732
lithofacies: Sedimentary record of subduction to forearc transition in the rotated Eocene basin of western Oregon
(Heller, Paul L., *et al.*) 7: 380
turbidite: Eustatic control of turbidites and winnowed turbidites; discussions and reply
(Mullins, Henry T., *et al.*) 1: 57
sedimentary rocks—lithostratigraphy
Paleozoic: Mid-Paleozoic age of the Roberts thrust unsettled by new data from northern Nevada; discussion and reply
(Johnson, J. G., *et al.*) 1: 60
sedimentary rocks—organic residues
coal: Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah; discussion and reply
(Fassett, James E., *et al.*) 12: 736
sedimentary structures *see also* sedimentary rocks; sediments
sedimentary structures—biogenic structures
algal mats: Role of bacterial mats in oxygen-deficient marine basins and coastal upwelling regimes; preliminary report
(Williams, Loretta Ann, *et al.*) 5: 267
sedimentary structures—genesis
interpretation: Are these the oldest metazoan trace fossils?; discussion and reply
(Cloud, Preston, *et al.*) 10: 618
neptunian dikes: Neptunic dikes and their relation to the hydrodynamic circulation of submarine hydrothermal systems
(Hsu, Kenneth J.) 8: 455
sedimentary structures—secondary structures
stylolites: Burial dolomitization in the Lost Burro Formation (Devonian), east-central California, and the significance of late diagenetic dolomitization
(Zenger, Donald H.) 9: 519
— Fluid inclusion petrography and tectonic-burial history of the Al Ali No. 2 well; evidence for the timing of diagenesis and oil migration, northern Oman Foredeep
(Burruss, R. C., *et al.*) 10: 567
sedimentation—controls
tectonic controls: Analogous tectonic evolution of the Ordovician foredeeps, Southern and Central Appalachians; discussion and reply
(Hiscott, R. N., *et al.*) 12: 732
— Evolution of the early Paleozoic deep-water basin of North Greenland; aulacogen or narrow ocean?
(Surlyk, Finn, *et al.*) 2: 77
— Influence of the Onion Creek salt diapir on the late Cenozoic history of Fisher Valley, southeastern Utah
(Colman, Steven M.) 4: 240
— Rates of late Cenozoic tectonism in the Vallecito-Fish Creek basin, western Imperial Valley, California
(Johnson, Noye M., *et al.*) 11: 664
— Subsidence analysis of the Cordilleran miogeocline; implications for timing of late Proterozoic rifting and amount of extension
(Armin, Richard A., *et al.*) 12: 702
— Tectonic models for Early Cretaceous rifting in southeastern Arizona; discussion and reply
(Drewes, Harald, *et al.*) 6: 364
— Worldwide continental denudation and climatic deterioration during the late Tertiary; evidence from deep-sea sediments; discussion
(Belderson, R. H., *et al.*) 6: 366
sedimentation—cyclic processes
marine sedimentation: Quaternary aragonite cycles and oxygen-isotope record in Bahamian carbonate ooze
(Droxler, A. W., *et al.*) 4: 235
reef sedimentation: Isotopic composition of bank margin carbonates on Midway Atoll; amplitude constraint on post-early Miocene eustasy
(Major, Richard P., *et al.*) 6: 335
transgression: Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah
(Ryer, Thomas A.) 4: 207
— Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah; discussion and reply
(Fassett, James E., *et al.*) 12: 736
sedimentation—environment
anaerobic environment: Role of bacterial mats in oxygen-deficient marine basins and coastal upwelling regimes; preliminary report
(Williams, Loretta Ann, *et al.*) 5: 267
marine environment: Increased productivity in the eastern equatorial Pacific during the last glacial maximum (19,000 to 14,000 yr B.P.)
(Pedersen, Thomas F.) 1: 16
sedimentation—precipitation
aragonite: Evidence for primary aragonite precipitation, lower Proterozoic (1.9-Ga) Rocknest Dolomite, Wopmay Orogen, Northwest Canada
(Grotzinger, J. P., *et al.*) 12: 710
sedimentation—processes
deep-sea sedimentation: Deep-sea erosional unconformity in the southeastern Gulf of Mexico
(Angstadt, D. M., *et al.*) 4: 215
— Furrowed outcrops of Eocene chalk on the lower continental slope offshore New Jersey
(Robb, James M., *et al.*) 3: 182
glaciomarine sedimentation: Glaciomarine model for upper Precambrian diamictites of the Port Askaig Formation, Scotland
(Eyles, Carolyn H., *et al.*) 12: 692
— Late Oligocene-early Miocene glacial record of the Ross Sea, Antarctica; evidence from DSDP Site 270
(Leckie, R. Mark, *et al.*) 10: 578
lacustrine sedimentation: Sedimentation in a large lake; a reinterpretation of the late Pleistocene stratigraphy at Scarborough Bluffs, Ontario, Canada
(Eyles, Carolyn H., *et al.*) 3: 146
sedimentation—provenance
fluvial sedimentation: Application of Landsat multispectral scanner data and sediment spectral reflectance measurements to mapping of the Meatiq Dome, Egypt
(Jacobberger, P. A., *et al.*) 10: 587
lithofacies: Sedimentary record of subduction to forearc transition in the rotated Eocene basin of western Oregon
(Heller, Paul L., *et al.*) 7: 380

sedimentation—sedimentation rates
marine sedimentation: Isotope-plankton comparisons in a late Quaternary core with a stable temperature history
(Crowley, T. J., *et al.*) 5: 275
nearshore sedimentation: Concepts of sediment deposition and accumulation applied to the continental shelf near the mouth of the Yangtze River
(McKee, Brent A., *et al.*) 11: 631
sedimentation—transport
turbidity currents: Distributary channel meandering and bifurcation patterns on the Amazon deep-sea fan as revealed by long-range side-scan sonar (GLORIA)
(Damuth, John E., *et al.*) 2: 94
— Eustatic control of turbidites and winnowed turbidites; discussions and reply
(Mullins, Henry T., *et al.*) 1: 57
— Flow-head deposits in ash turbidites
(Sparks, R. S. J., *et al.*) 6: 348
— Flow transformations in sediment gravity flows
(Fisher, Richard V.) 5: 273
sediments *see also* sedimentary rocks; sedimentary structures; sedimentation
sediments—clastic sediments
ooze: Quaternary aragonite cycles and oxygen-isotope record in Bahamian carbonate ooze
(Droxler, A. W., *et al.*) 4: 235
sediments—environmental analysis
glaciolacustrine environment: Sedimentation in a large lake; a reinterpretation of the late Pleistocene stratigraphy at Scarborough Bluffs, Ontario, Canada
(Eyles, Carolyn H., *et al.*) 3: 146
sediments—lithostratigraphy
Cretaceous: Spheroids at the Cretaceous-Tertiary boundary are altered impact droplets of basaltic composition
(Montanari, Alessandro, *et al.*) 11: 668
sediments—marine sediments
composition: Increased productivity in the eastern equatorial Pacific during the last glacial maximum (19,000 to 14,000 yr B.P.)
(Pedersen, Thomas F.) 1: 16
distribution: Concepts of sediment deposition and accumulation applied to the continental shelf near the mouth of the Yangtze River
(McKee, Brent A., *et al.*) 11: 631
provenance: Worldwide continental denudation and climatic deterioration during the late Tertiary; evidence from deep-sea sediments; discussion
(Belderson, R. H., *et al.*) 6: 366
textures: Flow-head deposits in ash turbidites
(Sparks, R. S. J., *et al.*) 6: 348
seismic methods *see under* geophysical methods
seismic surveys *see under* geophysical surveys *under* Atlantic Ocean; automatic data processing; Georgia; Gulf of Mexico; Kansas; New Zealand; Oklahoma; Utah; Wyoming
seismology *see also* engineering geology
seismology—crust
deep seismic sounding: COCORP profiling across the Southern Oklahoma Aulacogen; overthrusting of the Wichita Mountains and compression within the Anadarko Basin
(Brewer, J. A., *et al.*) 2: 109
— Depth migration and interpretation of the COCORP Wind River, Wyoming, seismic reflection data
(Lynn, Heloise Bloxsom, *et al.*) 8: 462
discontinuities: Intracrustal complexity in the United States Midcontinent; preliminary results from COCORP surveys in northeastern Kansas
(Brown, L., *et al.*) 1: 25
geophysical profiles: Cenozoic and Mesozoic structure of the eastern Basin and Range Province, Utah, from COCORP seismic-reflection data
(Allmendinger, Richard W., *et al.*) 9: 532
seismograms: Reprocessed COCORP Southern Appalachian reflection data; root zone to coastal plain
(Iverson, William P., *et al.*) 7: 422
velocity structure: Crustal structure of Fiordland, southwestern New Zealand, from seismic-refraction measurements
(Priestley, Keith, *et al.*) 11: 660
— Intrabasement structure in the southern Angola Basin
(Musgrove, Lee A., *et al.*) 3: 169
seismology—earthquakes
causes: Triggered reverse fault and earthquake due to crustal unloading, Northwest Transverse Ranges, California
(Yerkes, R. F., *et al.*) 5: 287
focal mechanism: Recent seismicity near Capitol Reef National Park, Utah, and its tectonic implications
(Humphrey, James R., *et al.*) 8: 447
prediction: Earthquake prediction
(Allen, Clarence R.) 12: 682
seismicity: Seismicity of the Colorado Lineament
(Brill, Kenneth G., Jr., *et al.*) 1: 20
— Seismicity of the Colorado Lineament; discussions and reply

Spain—sedimentary petrology
sediments: Spheroids at the Cretaceous-Tertiary boundary are altered impact droplets of basaltic composition
(Montanari, Alessandro, *et al.*) 11: 668
Spain—structural geology
folds: Emplacement of a fold-nappe, Betic Orogen, southern Spain; discussion and reply
(Torres-Roldan, R. L., *et al.*) 7: 426
Spermatophyta—fossilization
taphonomy: Erect floating stumps in Spirit Lake, Washington
(Coffin, Harold G.) 5: 298
— Erect floating stumps in Spirit Lake, Washington; discussion and reply
(Fritz, William J., *et al.*) 12: 733
strontium—isotopes
Sr-87/Sr-86: Implications of oxygen-isotope data and trace-element modeling for a large-scale mixing model for the Columbia River Basalt
(Nelson, Dennis O.) 4: 248
— Nd-Sr isotopic study of primitive lavas from the Troodos ophiolite, Cyprus; evidence for a subduction-related setting
(McCulloch, M. T., *et al.*) 12: 727
structural analysis *see also* folds; foliation

structural analysis—folds
domes: Geology and origin of Meatiq Dome, Egypt; a Precambrian metamorphic core complex?
(Sturchio, Neil C., *et al.*) 2: 72
polyphase processes: Complex refolding history of the Pelona, Orocopia, and Rand schists, Southern California
(Jacobson, Carl E.) 10: 583

structural analysis—interpretation
complexes: Shuswap Terrane of British Columbia; a Mesozoic "core complex"
(Brown, Richard L., *et al.*) 3: 164
domes: Structural evidence for dikes beneath silicic domes, Medicine Lake Highland Volcano, California
(Fink, Jonathan H., *et al.*) 8: 458
polyphase processes: Alpine model for the internal metamorphic zones of the North American Cordillera
(Mattauer, Maurice, *et al.*) 1: 11

structural analysis—preferred orientation
phenocrysts: Grain orientation and depositional ramps as flow direction indicators of a large-scale pyroclastic flow deposit in Japan; discussion and reply
(Varga, Robert J., *et al.*) 3: 188

structural geology—practice
current research: Tectonics
(Moores, E. M.) 12: 689

structural petrology *see* structural analysis

stylolites *see under* secondary structures *under* sedimentary structures

sulfides *see under* minerals

sulfur—geochemistry
magmas: Igneous sulfides in the Fish Canyon Tuff and the role of sulfur in calc-alkaline magmas
(Whitney, James A., *et al.*) 2: 99

sulphur *see* sulfur

Switzerland—geochemistry
isotopes: Origin of calcite in syntectonic veins as determined from carbon-isotope ratios
(Dietrich, Dorothee, *et al.*) 9: 547

Switzerland—structural geology
tectonics: Role of shear in development of the Helvetic fold-thrust belt of Switzerland
(Ramsay, John G., *et al.*) 8: 439

symposia—economic geology
metal ores: Hydrodynamics and geochemistry of ore generation in sedimentary environments
(Kelly, William C., *et al.*) 5: 309
— Origin of fluids and metals in porphyry and epithermal mineral deposits
(LeAnderson, Jim, *et al.*) 9: 557

symposia—sedimentary petrology
diagenesis: Models of diagenesis in clastic reservoirs
(Wood, J., *et al.*) 3: 187

symposia—stratigraphy
archaeology: Archaeological geology in the eastern Mediterranean
(Herz, Norman, *et al.*) 1: 49

symposia—structural geology
orogeny: Sonoma Orogeny and Permian to Triassic tectonism in western North America
(Gabrielse, Hubert, *et al.*) 8: 484
tectonics: Tectonic history of the Ouachita Orogen
(Thomas, William A., *et al.*) 8: 482

symposia—tectonophysics
crust: Ancient crustal rocks, Brazilian style
(Van Schmus, Randy) 1: 53
— On the ophiolite trail
(Moores, Eldridge M.) 1: 53
plate tectonics: The Antarctic Plate; a global perspective
(Dalziel, Ian W. D., *et al.*) 2: 118

Tanzania—volcanology
Kerimasi: Natrocarbonatite tephra of Kerimasi Volcano, Tanzania
(Hay, Richard L.) 10: 599

tectonics *see also* faults; folds; geosynclines; orogeny; structural analysis; *see also under* structural geology *under* Alps; Appalachians; Arabian Peninsula; Arizona; Arkansas; Basin and Range Province; Brazil; British Columbia; Canada; Egypt; Far East; Greenland; Nevada; New Mexico; New York; Newfoundland; North America; Oklahoma; Pennsylvania; Rocky Mountains; South America; Switzerland; symposia; Western Interior; Western U.S.

tectonics—concepts
processes: Tectonics
(Moores, E. M.) 12: 689

tectonophysics—practice
current research: Marine geology and geophysics
(Silver, Eli A.) 12: 686
— Solid earth geophysics

United States—economic geology
fuel resources: Oil and gas resources; Hubbert's curves revisited
(Bailly, Paul A.) 12: 680

United States—seismology
crust: Intracrustal complexity in the United States Midcontinent; preliminary results from COCORP surveys in northeastern Kansas
(Brown, L., *et al.*) 1: 25

earthquakes: Seismicity of the Colorado Lineament
(Brill, Kenneth G., Jr., *et al.*) 1: 20
— Seismicity of the Colorado Lineament; discussions and reply
(Wong, Ivan G., *et al.*) 9: 558
United States—stratigraphy
Paleozoic: Diagenetic magnetite carries ancient yet secondary remanence in some Paleozoic sedimentary carbonates
(McCabe, Chad, *et al.*) 4: 221
Proterozoic: Proterozoic structural provinces in the north-central United States
(Dutch, Steven I.) 8: 478
Utah—economic geology
coal: Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah
(Ryer, Thomas A.) 4: 207
— Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah; discussion and reply
(Fassett, James E., *et al.*) 12: 736
Utah—geophysical surveys
seismic surveys: Cenozoic and Mesozoic structure of the eastern Basin and Range Province, Utah, from COCORP seismic-reflection data
(Allmendinger, Richard W., *et al.*) 9: 532
Utah—seismology
earthquakes: Recent seismicity near Capitol Reef National Park, Utah, and its tectonic implications
(Humphrey, James R., *et al.*) 8: 447
Utah—stratigraphy
Cretaceous: Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah
(Ryer, Thomas A.) 4: 207
— Transgressive-regressive cycles and the occurrence of coal in some Upper Cretaceous strata of Utah; discussion and reply
(Fassett, James E., *et al.*) 12: 736
Utah—structural geology
salt tectonics: Influence of the Onion Creek salt diapir on the late Cenozoic history of Fisher Valley, southeastern Utah
(Colman, Steven M.) 4: 240
Vertebrata *see also* ichnofossils; problematic fossils; Reptilia
volcanic features *see under* geomorphology
volcanic rocks *see under* igneous rocks
volcanism *see under* volcanology
volcanoes *see under* volcanology
volcanology—volcanism
explosive eruptions: Large wave forms from the Fish Canyon Tuff, Colorado
(Self, S., *et al.*) 8: 443
island arcs: Origin of K_2O-SiO_2 trends in volcanoes of the Mariana Arc
(Meijer, Arend, *et al.*) 2: 67
periodicity: Nested calderas and trapdoor uplift at Pantelleria, Strait of Sicily
(Mahood, Gail, *et al.*) 12: 722
— Time and space constraints on the evolution of medium-rate spreading centers
(Lichtman, Grant S., *et al.*) 10: 592
— Troodos extrusive series of Cyprus; a comparison with oceanic crust
(Schmincke, Hans-Ulrich, *et al.*) 7: 405
plinian-type eruptions: Plinian airfall deposits of basaltic composition
(Williams, Stanley N.) 4: 211
— Plinian airfall deposits of basaltic composition; discussion and reply
(Bice, David C., *et al.*) 10: 616
volcanoes: Laccoliths(?) and small volcanoes on the flank of the East Pacific Rise
(Lonsdale, Peter) 12: 706
volcanology—volcanoes
Kerimasi: Natrocarbonatite tephra of Kerimasi Volcano, Tanzania
(Hay, Richard L.) 10: 599
Kilauea: Distribution of differentiated tholeiitic basalts on the lower East Rift Zone of Kilauea Volcano, Hawaii; a possible guide to geothermal exploration
(Moore, Richard B.) 3: 136
Mount Pelee: Mount St. Helens 1980 and Mount Pelee 1902; flow or surge?
(Walker, George P. L., *et al.*) 10: 571
Mount Saint Helens: Erect floating stumps in Spirit Lake, Washington
(Coffin, Harold G.) 5: 298
— Erect floating stumps in Spirit Lake, Washington; discussion and reply
(Fritz, William J., *et al.*) 12: 733
— Mount St. Helens 1980 and Mount Pelee 1902; flow or surge?
(Walker, George P. L., *et al.*) 10: 571
Santorini: Flow-head deposits in ash turbidites
(Sparks, R. S. J., *et al.*) 6: 348
Wales—petrology
metamorphic rocks: Pre-Mesozoic lawsonite in Anglesey, northern Wales; preservation of ancient blueschists
(Gibbons, Wes, *et al.*) 1: 3
Washington—environmental geology
geologic hazards: Erect floating stumps in Spirit Lake, Washington
(Coffin, Harold G.) 5: 298
— Erect floating stumps in Spirit Lake, Washington; discussion and reply
(Fritz, William J., *et al.*) 12: 733
Washington—geochronology
Eocene: Radiometric dating of ash partings in coal of the Eocene Puget Group, Washington; implications for paleobotanical stages
(Turner, Donald L., *et al.*) 9: 527
Washington—geomorphology
fluvial features: Shapes of streamlined islands on Earth and Mars; experiments and analyses of the minimum-drag form
(Komar, Paul D.) 11: 651
Washington—volcanology
Mount Saint Helens: Mount St. Helens 1980 and Mount Pelee 1902; flow or surge?
(Walker, George P. L., *et al.*) 10: 571
waste disposal—radioactive waste
storage: Geologic disposal of commercial radioactive waste
(Klingsberg, Cyrus) 12: 688
water *see also* hydrogeology; hydrology
weathering—minerals
feldspar group: Mechanics and kinetics of incongruent feldspar dissolution
(Gardner, Leonard Robert) 7: 418
West Indies *see also* Bahamas; Barbados; Jamaica; Lesser Antilles
Western Hemisphere *see also* Atlantic Ocean; North America; Pacific Ocean; South America
Western Hemisphere—tectonophysics
plate tectonics: Amazon Rift and Pisco-Jurua Fault; their relation to the separation of North America from Gondwana
(Szatmari, Peter) 5: 300
Western Interior—structural geology
tectonics: Seismicity of the Colorado Lineament
(Brill, Kenneth G., Jr., *et al.*) 1: 20
— Seismicity of the Colorado Lineament; discussions and reply
(Wong, Ivan G., *et al.*) 9: 558
Western U.S. *see also* Alaska; California; Colorado; Hawaii; Idaho; Montana; Nevada; Oregon; Utah; Washington; Wyoming
Western U.S.—petrology
metamorphism: Influence of time on metamorphism of sedimentary organic matter in liquid-dominated geothermal systems, western North America
(Barker, Charles E.) 7: 384
Western U.S.—structural geology
tectonics: Subsidence analysis of the Cordilleran miogeocline; implications for timing of late Proterozoic rifting and amount of extension
(Armin, Richard A., *et al.*) 12: 702
Western U.S.—tectonophysics
plate tectonics: Tectonic implications of a late Mesozoic fold and thrust belt in northwestern Nevada
(Oldow, John S.) 9: 542

Wisconsin—geophysical surveys
magnetic surveys: Correlation of magnetic anomalies in east-central Minnesota and northwestern Wisconsin; constraints on magnitude and direction of Keweenawan rifting
(Chandler, Val W.) 3: 174
worms—biostratigraphy
Cambrian: Precambrian-Cambrian transition problem in western North America; Part I, Tommotian fauna in the southwestern Great Basin and its implications for the base of the Cambrian System
(Mount, Jeffrey F., *et al.*) 4: 224
Wyoming—geophysical surveys
seismic surveys: Depth migration and interpretation of the COCORP Wind River, Wyoming, seismic reflection data
(Lynn, Heloise Bloxsom, *et al.*) 8: 462
Wyoming—paleobotany
Spermatophyta: Erect floating stumps in Spirit Lake, Washington
(Coffin, Harold G.) 5: 298
Wyoming—petrology
metamorphic rocks: Incompatible-element-rich andesitic amphibolites from the Archean of Montana and Wyoming; evidence for mantle metasomatism
(Mueller, Paul A., *et al.*) 4: 203
Wyoming—sedimentary petrology
sedimentary structures: Are these the oldest metazoan trace fossils?; discussion and reply
(Cloud, Preston, *et al.*) 10: 618
zoogeography *see* biogeography

Geological Oceanography Positions

The Ocean Drilling Project (ODP) invites application for the following anticipated positions: *Several full-time staff scientists (Ph.D. required).* These openings, in various fields of marine geoscience, are anticipated to be filled over a one year period commencing 01 October 1983. The successful candidates will be expected to participate approximately two months per year aboard a scientific drillship. These individuals will be responsible for coordinating activities prior and subsequent to the cruises, including the publication of results. The successful candidates will be expected to attend the JOIDES panel meetings relating to their scientific expertise. *Several full-time marine technicians.* Previous shipboard experience and undergraduate degree in geology or related science highly desirable. These positions require participation of about 6 months per year (alternating two months on and two months off) aboard a scientific drillship charter.

Applicants should submit a letter of application, curriculum vitae and names of 3 references to: Dr. Philip D. Rabinowitz, Project Director, ODP, Dept. of Oceanography, Texas A&M University, College Station, TX 77843.

An Equal Opportunity Employer

THE DECADE OF NORTH AMERICAN GEOLOGY PRESENTS

DNAG SPECIAL PUBLICATION 1

Perspectives in Regional Geological Synthesis:
Planning for
The Geology of North America

Edited by A. R. Palmer

A valuable set of preview statements and/or annotated outlines describing the organization of geological information for the 20 volumes of regional geology in *The Geology of North America* to be published by DNAG.

DNAG Special Publication 1, iv + 176 pages, 8½ × 11", 1982, bound in leatherette cover, CIP, ISBN 0-8137-5201-9. Priced for ALL geologists $7.50*

*special low price made possible by a grant from the GSA Foundation.

To order, mail check or money order in U.S. funds for full amount or include MasterCard or VISA account number, expiration date, and your signature. GSA Member discount allowed. Colo. residents add sales tax.

Order from: Publications Sales
Geological Society of America
P.O. Box 9140
Boulder, CO 80301

GSA/DNAG products still to come:
The Geology of North America—Continent/Ocean Transects
The Geological Map of North America—Centennial Field Guides
